**Major in Mathematics**

Mathematics is the science of numbers, shapes, probabilities, and measurements. It is a universal language in which information is stated in the simplest possible form. Mathematics has a dual nature—it is an independent discipline valued for its precision and elegance, and it is an essential source of ideas and techniques for many, if not most, other scientific endeavors.

The undergraduate program is structured to provide both a broad liberal arts education in mathematics, as well as a concentration in one of seven focused areas. The liberal arts component requires students to acquire a broad background in communication skills, humanities, social sciences, and natural sciences. The major core focuses on developing students’ understanding and appreciation of the mathematical sciences, problem solving skills, and their ability to combine knowledge and skills in productive ways. Core mathematics subjects include calculus, matrices and linear equations, advanced calculus of a single variable, abstract algebra, linear algebra, computer programming, and statistics.

Six concentrations are available in the program: Actuarial Science, Applied Mathematics, Computational Mathematics, General Mathematics, Mathematics Education, and Mathematics of Information.

**Learning Outcomes**

Graduates will:

- Obtain a solid background in theoretical mathematics and will be able to participate in mathematical work in a variety of fields or continue on to graduate school.
- Be able to apply a range of mathematical and statistical tools to a diverse set of problems as presented to them in either employment or the pursuit of further education.
- Be capable of describing their mathematical assumptions and results to colleagues.

**Potential Occupations**

The Mathematics major prepares students for a wide variety of occupations in business, industry, government, and education. Although a national shortage of mathematics teachers no longer exists, our mathematics education graduates have been successful in finding positions. Actuarial science graduates who have passed the first two professional actuary exams can expect to find positions in large metropolitan areas with good entry-level salaries. Applied mathematics graduates continue to find employment opportunities in government and private industry. Many pursue advanced degrees in mathematics, computational science, or engineering. About one-third of general mathematics graduates continue on to graduate school in mathematics or other disciplines, with the rest finding employment in a large variety of capacities. Participation in internships, volunteer activities, or cooperative education opportunities is highly recommended to enhance practical training and development. Graduates who continue to pursue advanced degrees can attain more responsible positions with the possibility of rising to top professional levels.

Career opportunities include, but are not limited to: applied mathematician, actuary, engineer, statistician, financial analyst/advisor, computer programmer, computer systems analyst, mortgage officer, market analyst, risk analyst, tax auditor, accountant, math educator.

**Concentrations**

- Actuarial Science Concentration
- Applied Mathematics Concentration
- Computational Mathematics Concentration
- General Mathematics Concentration
- Mathematics Education Concentration
- Mathematics of Information Concentration

**Major in Mathematics, Actuarial Science Concentration**

The Actuarial Science Concentration trains students how to use mathematics, statistics, business, and economics to analyze and plan for future situations involving financial uncertainties and risks. This concentration is designed to qualify students to take the first two examinations administered by the Society of Actuaries (https://www.soa.org/member) and provides the foundation for the remaining examinations.

**Requirements**

**Effective Spring 2018**

A minimum grade of C is required in all mathematics, statistics, and computer science courses that are required for graduation.

**Distinctive Completion Requirements for Degree Program:**

**TO PREPARE FOR FIRST SEMESTER:** The curriculum for the Major in Mathematics, Actuarial Sciences Concentration assumes students enter college prepared to take calculus. Entering students who are not prepared to take calculus will need to fulfill pre-calculus requirements in the first semester: MATH 117, MATH 118, MATH 124, MATH 125, MATH 126. A minimum grade of C is required in all Mathematics, Statistics, and Computer Science courses that are required by the major.
## Major in Mathematics, Applied Mathematics Concentration

The Applied Mathematics Concentration prepares students for careers as applied mathematicians working in business, government, and industry. It is recommended that students supplement the core mathematical program with courses in their chosen application area, for example, engineering, public health, finance, electronics, or geology. Course requirements emphasize mathematical foundations as well as the application of mathematics in other disciplines. In particular, students receive training in numerical analysis, mathematical modeling, statistics, and computing, as well as a solid preparation for further study.

### Requirements

**Major in Mathematics, General Mathematics Concentration**

General Mathematics is a Liberal Arts program designed to provide a solid foundation in mathematics with the flexibility to explore and develop expertise in other academic fields. Because of its flexibility, this concentration is well suited for students who want to combine mathematics with such fields as business, law, computer science, or statistics.

**Requirements**

**Effective Spring 2018**

A minimum grade of C is required in all mathematics, statistics, and computer science courses that are required for graduation.

Major in Mathematics, Mathematics Education Concentration

The Mathematics Education Concentration is designed to prepare students to teach mathematics through the high school level, including Advanced Placement and International Baccalaureate courses. The program provides the subject matter, education classes, and classroom experience required for secondary education licensure in Colorado.

Students interested in pursuing a teaching license through CSU may refer to the Center for Educator Preparation (http://www.cep.chhs.colostate.edu) and the College of Health and Human Sciences section for general information.

Requirements Effective Spring 2018

A minimum grade of C is required in all mathematics, statistics, and computer science courses that are required for graduation.

**Distinctive Requirements for Degree Program:**

TO PREPARE FOR FIRST SEMESTER: The curriculum for the Major in Mathematics, Mathematics of Information Concentration assumes students enter college prepared to take calculus. Entering students who are not prepared to take calculus will need to fulfill pre-calculus requirements in the first semester: MATH 117, MATH 118, MATH 124, MATH 125, MATH 126. A minimum grade of C is required in all mathematics, statistics, and computer science courses that are required by the major.

Major in Physics

Physics is the study of motion, matter, and energy. It is the most fundamental of sciences, and provides the essential underpinning for chemistry, biology, astronomy, and geology. Physicists probe the structure of atomic nuclei, study exotic states of matter that occur at ultra-low temperatures, and develop theories that predict the origin and destiny of the universe. Physics has practical applications to a wide variety of tasks such as fabricating very large scale integrated circuits, producing high efficiency solar cells, and developing nanomachines, high-power lasers, and scanners for imaging activity within the human brain. Fundamental research in physics has led to many important inventions, including the transistor, the computer, the flat panel display, and the cell phone.

The Physics Major begins with an emphasis on fundamentals in the basic sciences and mathematics to provide students with a broad foundation. Subsequent course work is designed to develop analytical and experimental abilities that allow students to solve problems involving the techniques of physics. The curriculum includes courses on classical mechanics, modern physics, quantum mechanics, electricity and magnetism, and thermodynamics. A strong liberal arts program rounds out the major and provides educational breadth. Participation in undergraduate research is strongly encouraged since it enhances practical training and expands employment opportunities, as well as being expected of anyone applying to research-based graduate programs.

Two concentrations are offered: Physics and Applied Physics. The former is the standard concentration, and is recommended for students planning to apply to graduate programs in Physics or related disciplines. The latter requires the student to select a specific "field": there are a variety to choose from, and each has its own menu of associated electives. The Applied Physics concentration is ideal for students who are double-majors in other technical disciplines, or who anticipate further education towards a career in health professions (including, notably, Medical Physics).

Learning Outcomes

Graduates will:

- Obtain a solid background in experimental physics and basic theoretical physics and will be able to work in a variety of technological or problem-oriented fields.
- Have the contemporary skills and knowledge necessary for entry-level positions in the field or for admission to graduate or professional schools.
- Be able to apply a range of physical and mathematical tools to a diverse set of physical problems encountered in the real world. They will be able to use a variety of laboratory techniques, critically interpret experimental results, and design appropriate new experiments.
• Have the ability to critically evaluate and solve a variety of physical problems, and to present their analysis and results to colleagues in both written and oral form.

Potential Occupations

Physics majors who go into the workforce directly after graduation use their training in a variety of settings. The primary employers for our graduates have been large aerospace/defense and electronics companies, as well as software firms and smaller high-tech companies. In addition to the more obvious jobs in those settings, such as computer programming, quality control, and electronics design, our students have also been hired in training and sales capacities. High school teaching is a possibility; there are several pathways for students with undergraduate Physics degrees to obtain teaching credentials. Physics graduates possess excellent mathematical and analytical skills that are useful in business and finance as well.

Our majors have gone on to research-based graduate programs in disciplines including Physics, Applied Physics, Applied Mathematics, Atmospheric Science, and Quantitative Biology. Those earning graduate degrees can work in college teaching and at industrial, government, and academic research labs and reach the highest professional levels.

Health Physics and Medical Physics are two less-known career paths that offer great opportunities for students interested in the direct application of physics to human well-being. The former is concerned with protecting people from dangers associated with ionizing radiation, while the latter involves working with x-ray machines and radioisotopes in clinical settings. Both require Master’s degrees in the discipline, and a Physics major is the preferred undergraduate preparation.

Concentrations

• Applied Physics Concentration
• Physics Concentration

Major in Physics, Applied Physics Concentration

The Applied Physics Concentration combines fundamental course work in physics with a selection of courses in a related field. Seven fields are available:

• The Electronics, Semiconductors, and Optics field and the Materials and Fluids field are designed for students interested in rapidly changing technology or in areas that overlap the boundaries of traditional engineering disciplines.
• The Computers field provides the background needed for the application of modern computer technology to problems in physics, the development of new types of computers, and jobs in computer programming.
• The Chemistry field combines thorough knowledge of both chemistry and physics, which is useful in such interdisciplinary areas as materials science, surface science, and studies of molecular systems.
• The Medical Physics field and the Biophysics field prepare students for further study in medical physics (the application of physics technologies to medical practice) and health physics (radiation safety and protection).
• The Geophysics field prepares students for fields such as geothermal energy and volcanology.

Requirements

Effective Fall 2016

Each course used to meet requirements of the concentration need a minimum grade of C-, including courses to satisfy AUCC Categories 1, 2, and 3A.

1. For students who change majors from Electrical Engineering or are double-majoring in Electrical Engineering, please see advisor for possible substitutions.
2. CHEM 301 or CO 301B are recommended. Other courses in AUCC Category 2 may be accepted if they are taken prior to declaring the Physics major or are taken to meet requirements of another major.
3. A minimum of 6 credits must be 300-, 400-, or 500-level.
4. Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300-, 400-level, or 500-level).

### Major Completion Map

**Distinctive Requirements for Degree Program:**

Required PH courses above the 100-Level (with the exception of PH 293 and, if there is sufficient demand, PH 314) are offered only Fall or Spring, not both. A grade of C- or better is required in all courses used to meet requirements of the major, except for unrestricted electives and courses taken to satisfy All-University Core Curriculum (AUCC) categories 3B, 3C, 3D, and 3E. Many courses in a Selected Field list have prerequisites outside the Department of Physics. Any student considering the Applied Physics concentration should meet with an advisor as soon as possible. Note that PH 327 may be replaced by three credits from each of the two Technical Electives Lists.

Major in Physics, Physics Concentration

The physics concentration provides a broad background in physics that serves as a base for later specialization, either in graduate school or on the job. It is designed for those seeking greater insight into physics and an introduction to more advanced topics and methods. Students who obtain a degree in physics with the physics concentration are prepared for a career in industry or government, or for advanced study at the graduate level.

Requirements
Effective Fall 2016

Each course used to meet requirements of the concentration need a minimum grade of C-, including courses to satisfy AUCC Categories 1, 2, and 3A.

1 For students who change majors from Electrical Engineering or are double-majoring in Electrical Engineering, please see advisor for possible substitutions.
2 CHEM 301 and CO 301B are recommended. Other courses in All-University Core Curriculum (AUCC) Category 2 may be accepted as substitutes if they are taken prior to declaring the Physics major or are taken to meet requirements of another major.
3 Select enough elective credits to bring the program total to a minimum of 120 credits, of which at least 42 must be upper-division (300-, 400-level).
4 Only 3 credits from this course are applied towards the Technical Electives requirement.

**Major Completion Map**

**Distinctive Requirements for Degree Program:**

Required PH courses above the 100-Level (with the exception of PH 293 and, if there is sufficient demand, PH 314) are offered only Fall or Spring, not both. A grade of C- or better is required in all courses used to meet requirements of the major, except for unrestricted electives and courses taken to satisfy All-University Core Curriculum (AUCC) categories 3B, 3C, 3D, and 3E. Note that PH 327 may be replaced by six credits from the Mathematics and Statistics Electives List.

**Minor in Physics**

Most technical fields require some background in physics. A minor in Physics could provide students with an increased understanding of the foundations of their chosen major. For students majoring in Computer Science and Mathematics, a minor in Physics provides experience in applying the skills acquired in their major to concrete physical problems.

**Requirements**

**Effective Fall 2008**

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

A minimum grade of C- is required in all physics courses required for the minor in physics.

Major in Psychology

Psychology is one of the most popular and versatile majors. The major emphasizes a strong background in the natural sciences (e.g., mathematics, chemistry, biology, statistics, human physiology), writing, and research.

Electives enable students to obtain a second major or minor in a field of interest or take pre-professional courses and graduate with:

1. A combination of courses and experiences to qualify for semiprofessional jobs in psychological settings or closely-related fields (e.g., addictions counseling);
2. A combination of courses providing a background for careers outside of psychology (e.g., human resources);
3. Pre-professional courses for potential admittance into professional training programs (e.g., medicine, occupational therapy, veterinary medicine); and/or
4. A complement of courses for potential admittance into psychology graduate school programs. Advanced degrees are often a prerequisite for professional careers in psychology.

Learning Outcomes

Students will:

• Demonstrate understanding of the basic theories, principles, and laws of behavior.
• Demonstrate knowledge of psychological principles and concepts across several content areas.
• Demonstrate knowledge and appreciation of the scientific methods used in psychological research by engaging in analytical and critical thinking.
Potential Occupations
A B.S. degree in Psychology prepares students for a variety of career opportunities. Because of the strong science orientation, students develop a number of important skills required in a broad range of occupations. Skills such as written and oral communication, cooperation, analytical and critical thinking, and a background in the sciences demonstrate versatility and an ability to pursue a variety of career paths. Participating in paid or volunteer work, internships, study abroad and experiential education opportunities are highly recommended to increase students’ employment opportunities.

Possible career opportunities include, but are not limited to: addictions counselor, human services worker, case worker, mental health services worker, probation officer, community relations officer, educator, program developer/administrator, human resources administrator, labor relations representative, compensation and benefits administrator, public relations specialist/special events administrator, advertising producer/writer, account services representative, media representative, market researcher, government program administrator, business manager, buying agent, sales representative, real estate broker, industrial/organizational consultant, psychometrician, neuropsychologist (with advanced degree), cognitive neuroscientist (with advanced degree), engineering psychologist (with advanced degree), clinical psychologist (with advanced degree), family therapist (with advanced degree), lawyer (with advanced degree), occupational therapist (with advanced degree), veterinarian (with advanced degree) or physician (with advanced degree).

Major in Statistics

Statistics is the science of modeling, summarizing, and analyzing data. Statisticians help people produce trustworthy data, analyze the data, and present the results in a useful manner. Statisticians work with people from other professional backgrounds to solve practical problems. They provide crucial guidance in determining what information is reliable and which predictions can be trusted. An exciting aspect of the field is the diversity of areas where statistical methods are used; this is one reason for continuing strong demand for well-trained statisticians. With the popularity of big data and the focus on quantitative analysis in many fields, there will continue to be a high demand for graduates with a statistics major or minor. Students who succeed in the field of statistics typically have strong quantitative skills, analytical minds, and like to help other people solve problems.

Learning Outcomes

Students completing this program will be able to:

- Conceptualize analytical questions in terms of a model,
- Apply their knowledge of the core set of statistical methods,
- Perform data analysis using statistical software,
- Interpret and communicate statistical results,
- Either attend graduate school in statistics or find professional employment in a statistics field upon completion of a statistics major.

Potential Occupations

Statisticians find employment in a wide range of industries including medicine (evaluating new medicines and medical treatments), computing, business, market research, natural resources, government, and more. Almost every industry has a statistician or a group of statisticians somewhere in the organization. Graduate school is another pathway after graduation. Many of our undergraduate majors have continued on to graduate school in statistics, either at CSU or other universities. Almost all statistics majors are able to find work in this field and/or gain entrance to graduate school after successfully completing a Statistics degree.

Concentrations

- General Statistics Concentration
- Mathematical Statistics Concentration

Requirements

No new students are being admitted to this stand-alone major. Students interested in this area of study, please visit the General Statistics Concentration or Mathematical Statistics Concentration program pages.

Major in Statistics, General Statistics Concentration

Minor in Applied Statistics

The minor in Applied Statistics is designed for students pursuing non-calculus based majors. The minor in Applied Statistics is a great way for students to highlight their quantitative abilities when applying for jobs and graduate school.

Requirements

Effective Fall 2017

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

A minimum grade of C must be achieved in all statistics courses (STAT subject code and dual-listed) required for the minor in applied statistics.

*This certificate may have courses in common with other graduate certificates. A student may earn more than one certificate, but a given course may be counted only in one certificate.

Graduate Certificate in Theory and Applications of Regression Models

Applications of regression analysis, generalized regression models, probability and mathematical statistics and other topics in statistical analysis. The focus is on the practical methods in regression analysis, understanding patterns and structure in data, and the explanation of findings.

Distinctive Requirements for Certificate: GSSL 3095 and GSSL 3096 (or STAT 500) are required skills courses and should be taken first. GSSL 3095 is intended not only as a review, but also as instruction in using the math skills in a statistical context. It does not replace the math prerequisites indicated. GSSL 3096 covers use of SAS and R programming. STAT 500 is a 1-credit version of GSSL 3096.

Master of Applied Statistics, Plan C (M.A.S.)

The Master of Applied Statistics emphasizes practical methods in statistics, focusing on applications and computational aspects, rather than theory. The goal of this degree is to enable students to start working as practicing statisticians in industry or government immediately after graduation. Students will receive a strong background in statistical computing while completing this degree. Full time students complete the M.A.S. degree in eleven months; however, this degree may also be completed part time, either online or on campus. Students who succeed in the field of statistics typically have strong quantitative skills, analytical minds, and like to help other people solve problems.

College Programs
A concern for health and the diseases of animals and humans provides the unifying theme for the undergraduate, professional, and graduate programs of the College of Veterinary Medicine and Biomedical Sciences (CVMBS)—a manifestation of the concept of One Health. The College combines teaching, research, and public service activities in basic biomedical disciplines such as anatomy, neurobiology, physiology, microbiology, pathology, and radiological health sciences, with applied disciplines such as clinical veterinary medicine and surgery, diagnostic imaging, radiology, clinical laboratory sciences, epidemiology, and environmental health sciences. Graduates of the College in either the veterinary sciences or the biomedical sciences serve society in the broadest sense: they represent the concept that there is but “one medicine” supporting “one health” with human and animal health intimately interrelated within their environments.

Major Courses of Study
The CVMBS offers undergraduate, professional, and graduate courses of study. There are four undergraduate programs leading to the Bachelor of Science, with majors in Neuroscience in partnership with the College of Natural Sciences, Biomedical Sciences, Environmental Health and Microbiology. The Bachelor of Science degree requires a minimum of 120 credits with a minimum of 42 credits in upper-division courses. The four-year professional veterinary medical program leads to the Doctor of Veterinary Medicine degree; students in this program typically complete a baccalaureate degree prior to program admission. Graduate studies in each of the four departments of the college lead to Master of Science and Doctor of Philosophy degrees with selected professional master’s programs serving emerging needs in society and through practitioner skill development.

Education Abroad
Education abroad programs are available to students in the CVMBS. Because the knowledge of at least one other culture is valuable in understanding our own, students are strongly encouraged to study outside the United States. Students interested in education abroad should plan far in advance by discussing opportunities with their academic advisor and by visiting the Office of International Programs (http://international.colostate.edu) in Laurel Hall.

Continuing and Distance Education
The CVMBS supports the veterinary profession by offering continuing education courses that enable practicing veterinarians to obtain new medical information and meet the Colorado Veterinary Practice Act continuing education requirements for re-licensure. The College shares responsibility for continuing education and maintains close liaison with the American Veterinary Medical Association (AVMA), the Colorado Veterinary Medical Association (CVMA), the Colorado Board of Veterinary Medicine, and the Western Interstate Commission for Higher Education (WICHE). Innovative programs like Health Professions preparation—for students finishing essential courses to prepare to pursue health professions—are offered through CSU Online.

Graduate Programs
Programs leading to the Master of Science and Doctor of Philosophy degrees are offered in all departments of the College.

Students with Bachelor of Science or Doctor of Veterinary Medicine (DVM) degrees or well-qualified students who are currently pursuing veterinary medicine degrees, are eligible to study for advanced degrees in the Departments of Biomedical Sciences; Clinical Sciences; Environmental and Radiological Health Sciences; and Microbiology, Immunology, and Pathology.
The CVMBS and the College of Business have created a combined five-year DVM/MBA program of study that can result in earning both the Master of Business Administration (MBA) degree and the DVM degree. Applicants to the DVM program are encouraged to consider extending their veterinary education to include a one-year start to an MBA degree. After successfully completing the first year of the MBA program, students will be guaranteed admission to the first year of the DVM program and will be expected to complete the remaining MBA course requirements concurrently with the first two years of the DVM curriculum. This program was undertaken to improve training of our students in veterinary practice management, business and economics beyond what is currently offered as core content within the DVM curriculum.

Combining the expertise from public/environmental health and veterinary medicine and partnering with the Colorado School of Public Health (http://publichealth.ucdenver.edu), the College has created a five-year DVM/MPH program which will provide specialty training in veterinary medicine and public health. Students spend the first year in the MPH program, years 2 and 3 jointly in the DVM and MPH programs, and then years 4 and 5 focusing on completing the DVM requirements. Given the threats to public health from zoonotic diseases, changing ecosystems due to climate, and enhanced need for health professionals versed in the interplay of human, animal and environmental factors, DVM/MPH graduates bring a critical skill set to bear on issues of significant public impact.

The CVMBS and the Department of Animal Sciences within the College of Agricultural Sciences have partnered in developing a DVM/MS-Animal Sciences 5-year combined degree, aimed at offering robust training in livestock production, animal health, industry and economics to future livestock veterinarians. Students will be optimally equipped to provide animal health services, advise individuals within production units, provide leadership within professional organizations, and contribute to knowledge development through research. Students complete graduate coursework in Animal Sciences and initiate clinical/field research in the first year, then complete research requirements during the subsequent 4 years of DVM training.

There is a national need for veterinarians who can serve as the bridge between research and all aspects of animal health and welfare. The College has developed a 7-year DVM/PhD program that will integrate clinical and research training to provide a dual degree to selected candidates. Numerous outstanding research opportunities exist in diverse areas that complement DVM training, including cancer biology, infectious disease, neurosciences, reproductive biology, epidemiology, orthopedic sciences, environmental health and toxicology. The typical DVM/PhD program progresses as follows:

- basic graduate study and laboratory rotations (year 1)
- first two years of DVM training plus electives and graduate work (years 2 and 3)
- exclusive research work in the PhD program (years 4 and 5)
- completion of the DVM training (years 6 and 7)

For detailed information about CVMBS graduate programs, view the College Academic Departments site (http://csu-cvmbs.colostate.edu/academics/Pages/default.aspx). Information on DVM combined degrees may be viewed on the CVMBS site (http://csu-cvmbs.colostate.edu/dvm-program/Pages/default.aspx).

### Interdepartmental Program

#### Doctor of Veterinary Medicine (DVM)

A four-year professional program in Veterinary Medicine is offered annually to approximately 148 students. Each year, approximately 138 students are admitted to the DVM program located on the main CSU campus in Fort Collins, Colorado. Additionally, up to 10 students are admitted to the CSU-University of Alaska Fairbanks (UAF) 2+2 DVM Program, completing the first 2 years of the 4-year program in Fairbanks, Alaska, and joining the larger cohort to complete years 3 and 4 in Fort Collins. These students graduate with a DVM degree from CSU, and enjoy unique opportunities at UAF in small animal sports medicine, rural outreach, conservation and wildlife medicine.

Because the number of applicants exceeds the number of students who can be admitted to any class, the members of the Admissions Committee for the CVMBS carefully evaluate each applicant to recommend those best qualified. Information concerning the academic program which leads to the DVM degree may be found in the Graduate and Professional Bulletin or online (http://csu-cvmbs.colostate.edu/dvm-program/Pages/default.aspx).

The full course of study requires four years beyond completion of the pre-veterinary requirements. While exceptional students may complete pre-veterinary requirements in two to three years and then be accepted into the DVM Program, it is much more common that students complete a baccalaureate degree or graduate degree, followed by four years in the professional program.

#### Pre-Veterinary Training for the Doctor of Veterinary Medicine Program

Students may complete pre-professional (pre-veterinary) training at any accredited institution whether these courses are part of a regularly offered baccalaureate program or whether the courses are taken as “stand alone” choices independent of a degree program. However, courses must be substantially equivalent in subject content and level as offered for pre-veterinary students at CSU.

Inquiries regarding equivalent or substitute courses that may be taken specifically to meet pre-veterinary preparation requirements should be directed to DVMAdmissions@colostate.edu. There is also a format for requests Prerequisite Substitute Course Request (http://csu-cvmbs.colostate.edu/Documents/dvm-preparatory-coursework-guide.pdf), which can be submitted to DVMAdmissions@colostate.edu.

While CSU students meeting the pre-veterinary requirements as an integral part of a degree program will take a higher number of credits, the minimum course requirements for admission to the DVM program, exclusive of electives, are:

- Arts, Humanities, Behavioral and Social Sciences – at least 12 semester credits. (The required credits for English composition explicit in most programs of study as all university requirements—see category that follows—do not fulfill these requirements.)
- Biological Sciences – at least three semester credits in genetics and a laboratory associated with a biological science course.
- Chemistry – at least three semester credits in biochemistry (requiring organic chemistry as a prerequisite) and a laboratory associated with a chemistry course.
- English Composition – at least three semester credits.
Physics – at least four semester credits with laboratory.

Statistics – at least three semester credits (upper-division course preferred).

Additional courses that are not required, but highly recommended, are anatomy, cell biology, developmental biology, histology, immunology, microbiology, nutrition, physiology, and computer science. These courses will enhance the student’s preparation for the DVM program.

The pre-veterinary requirement includes the previous categories and credits plus additional credits to total 60 semester credits that must be completed prior to admission to the DVM program. Students may apply prior to completing all prerequisite requirements; however, in order to assure the most competitive application, one is encouraged to have the majority of the prerequisites completed at time of application. The clear majority of students will complete the pre-veterinary requirements as part of a baccalaureate program. Exceptional students may apply for admission to the DVM program when only the pre-veterinary requirements are met.

Students who wish to pursue pre-professional veterinary medicine training (sufficient to meet minimum requirements to apply to the CSU DVM Program) through courses offered at CSU as part of their undergraduate degree program will find detailed information online (http://csu-cvmb.colostate.edu/Documents/dvm-preparatory-coursework-guide.pdf).

Food Animal Veterinary Career Incentive Program

There are many vacancies and numerous career opportunities in all sectors of private livestock practice, including mixed animal practice and specialty practices in dairy cattle, beef cow-calf, beef feedlots, sheep, small ruminants and swine. There are also many opportunities in public practice including food safety and inspection, communicable disease management, and regulatory veterinary medicine. Many practitioners and producers have found it difficult to recruit new graduates into food and fiber animal practice, especially in rural communities. Reduced veterinary participation in food and fiber production animal medicine may contribute to increased vulnerability of livestock industries to emerging infectious diseases, exotic and zoonotic diseases, public health risks from food safety and quality problems, lowered public confidence in animal agricultural products as well as threats to the national economy. Thus, the overarching goal of the Food Animal Veterinary Career Incentive Program (FAVCIP) is to create a sustainable source of future veterinarians for underserved disciplines and geographic regions central to the future of safe and successful food and fiber animal production. This program includes a plan of academic work, experience, and mentoring that encompasses undergraduate and veterinary medical education and meets specific needs of animal agriculture through a cooperative venture of the CVMBS and the Department of Animal Sciences in the College of Agricultural Sciences. It should be noted that DVM students who do not complete the FAVCIP may still focus coursework and clinical experiences on livestock medicine, especially in years 3 and 4.

Undergraduate students with a strong interest in the discipline will be encouraged to follow the FAVCIP curriculum and program requirements (http://csu-cvmb.colostate.edu/dvm-program/Pages/DVM-Special-Programs.aspx) as they complete their Bachelor of Science in Animal Science at CSU.

Major in Biomedical Sciences

An undergraduate degree in Biomedical Sciences prepares students for a wide variety of opportunities which have a basis in cellular and molecular biology, human/animal anatomy and physiology. In addition to enrolling in required courses, students will have opportunities to engage in elective courses and laboratory research in specialty areas of endocrinology, pharmacology, neurophysiology, reproductive physiology, and cardiopulmonary physiology. In this process, students are able to tailor their educational experiences to specific career objectives. The curriculum will prepare graduates to pursue further studies in professional schools for medicine, veterinary medicine, pharmacy, dentistry, and optometry, as well as other programs such as physician assistant and physical therapy. This degree will also prepare students for graduate studies in the biomedical sciences as well as for employment in a variety of innovative and developing fields in biotechnology.

The basic science curriculum meets many requirements for entrance into professional schools. Experiential learning opportunities are encouraged and could include participating in laboratory research, teaching/tutoring in selected courses, volunteer experiences and leadership positions within student club(s), study abroad, internships, and honors curriculum. These opportunities are encouraged with the student's interests and career goals as the focus.

Learning Outcomes

• Obtain a solid background in anatomy and physiology and be able to integrate knowledge from the molecular to the systemic level
• Demonstrate strong writing and oral communication skills
• Develop scientific hypotheses and experiments to test them
• Work effectively in groups
• Demonstrate effective organization, leadership, and laboratory skills
• Think critically and logically

Potential Occupations

A Bachelor of Science degree in Biomedical Sciences will provide students with a variety of opportunities for further study or employment in the broad area of biomedical sciences. The coursework is designed to prepare students for health-related graduate and professional programs. Post-graduate opportunities will include additional studies in specialty areas of physiology such as neuroscience, reproductive endocrinology, cardiopulmonary, and patho-physiology. Employment opportunities can be found in government at the local, state, and national levels; research in a variety of settings such as university, industry, and private laboratories; education; administration and management; and industry such as biotechnology, pharmaceuticals, and medical devices. Students will be exposed to skill sets which are necessary in a competitive, ever changing job market.

### Major Completion Map

**Distinctive Requirements for Degree Program:**

**TO DECLARE MAJOR:** competitive entry controls required and capped enrollment in place. Please see advisor in Department for more information.

**TO PREPARE FOR FIRST SEMESTER:** The curriculum for the Biomedical Sciences major assumes students enter college prepared to take calculus. Entering students who are not prepared to take calculus will need to fulfill pre#calculus requirements in the first semester. Those pre#calculus requirements are listed as benchmark courses in Freshman Semester 1 below. LIFE 102 requires high school chemistry as a prerequisite; CHEM 111 requires Algebra II as a prerequisite (this prerequisite is met by having Algebra II by test credit, transfer credit, or placement out of MATH 117 and MATH 118 on Math Placement Exam.

#### Freshman

** Semester 1**

Students will be required to take either MATH 155 or MATH 160 in Freshman semester 2. Students who intend to take MATH 160 will need to take MATH 126 in addition to MATH 124 and MATH 125

The Molecular, Cellular and Integrative Neuroscience Special Academic Unit offers an interdisciplinary undergraduate degree program with faculty in five different colleges and ten departments. Two different concentrations are offered as programs of study: Behavioral and Cognitive Neuroscience and Cell and Molecular Neuroscience. Both concentrations have a strong foundation in mathematics, physics, chemistry and biological sciences that utilize a common core for the first two years, differing in only a single course for each concentration, thus making it easy to switch between concentrations if a student’s interest changes during the first two years. Both concentrations require completion of an undergraduate thesis, providing significant opportunities for experiential learning in research laboratories in which they work closely with faculty, and which sometimes lead to authorship of original publications. Electives allow students in one concentration to acquire breadth and depth in the other area, if desired.

Learning Outcomes

Students will obtain:

- A command of basic concepts in chemistry, physics, biology, biochemistry, molecular biology, and cellular biology as well as a more in-depth understanding of the structure and function of the nervous system.
- An understanding of how the brain works, from molecules to the mind, and how its function becomes disrupted in diseases and following brain injury.
- The ability to critically analyze and present the methods, results, and conclusions of scientific papers in the current neuroscience literature, and orally present technical material in a clear and comprehensible form.
- Experience in the use of a variety of laboratory techniques, ability to critically interpret experimental results, and ability to design new experiments.
- The ability to perform original research or to critically analyze published work to advance an understanding of a specific area of neuroscience by preparing and defending an undergraduate thesis.

Potential Occupations

Possible career opportunities for students with a B.S. in Neuroscience include, but are not limited to: research technician, medical or clinical lab technologist, production/quality assurance lab technician, pharmaceutical research worker or salesperson, human resource specialist, neurotoxicology technician, teacher, writer, and research analyst. Many Neuroscience majors go to professional schools in medicine, veterinary medicine, or health sciences, or into graduate programs encompassing virtually all areas of biomedical sciences and psychology.

Concentrations

- Behavioral and Cognitive Neuroscience Concentration
- Cell and Molecular Neuroscience Concentration
Major in Neuroscience, Behavioral and Cognitive Neuroscience Concentration

Overview
The Behavioral and Cognitive Neuroscience concentration integrates an understanding of neuroanatomy with the mechanisms of sensation/perception and learning/memory, generally applied to human behavior. Its focus is at the functional level of neuronal systems and networks. It differs from classical psychology in providing a more in-depth cellular and molecular basis for understanding behavior and neurological disorders that influence behavior. Graduates with this concentration are well prepared for many graduate and professional degree programs in health professions, as well as for careers in a variety of clinical settings, non-profit disease oriented foundations, and private sector organizations in either research-related or human resource service-related positions.

### Major in Neuroscience, Cell and Molecular Neuroscience Concentration

The Cell and Molecular Neuroscience Concentration integrates neuroanatomy with the cellular and molecular basis of nervous system function. Its focus is to understand cellular based processes in neurons and glia at the molecular level. It differs from degree programs in biochemistry or biomedical sciences by its specific focus on the nervous system. Required courses in microbiology, immunology, biochemistry, and advanced cell biology provide an excellent background for students interested in pursuing careers in medicine or biomedical research through graduate/professional schools. However, graduates with this concentration should also be well qualified for any positions in academia, government or the private sector where knowledge of cell and molecular processes is required, whether or not it is applied to the nervous system.

Students in the CMN Concentration with strong research interests and a GPA of 3.250 or above, may qualify for early entry into the MS degree program in Biochemistry while pursuing the BS degree program in Neuroscience. Early entry requires that students have identified a faculty member willing to mentor them in their laboratory research for the MS degree and that they have obtained permission from the Neuroscience Program and the Department of Biochemistry and Molecular Biology to apply to the graduate school for this. Students can apply to the graduate program (allowing them access to courses above those at the 500 level) during the semester that they complete 90 or more credits. Students will be moved from undergraduate to graduate standing the semester after they complete 120 or more credits. At that time they begin paying graduate tuition and fees and will lose all undergraduate institutional and scholarship aid, but they can qualify for many graduate assistantships and fellowships. Both degrees can be awarded during the same semester but the MS degree cannot be awarded before completing the requirements of the BS degree.

Minor in Biomedical Sciences

The minor in Biomedical Sciences provides students with a useful complement to majors in animal science, biochemistry, biological science, health and exercise science, human development and family studies, microbiology, psychology, and other biomedical science areas. The program offers a variety of courses which serve to broaden the background of students pursuing professional careers in biomedical sciences, human and veterinary medicine, and a variety of health-related disciplines. Candidates begin the program with a course in physiology. The remainder of the required 21 credits is selected to complement the student’s educational goals and interests.

Requirements

Effective Fall 2015

Students must satisfactorily complete the total credits required for the minor. Minors and interdisciplinary minors require 12 or more upper-division (300- to 400-level) credits.

Additional coursework may be required due to prerequisites.

A minimum grade of C (2.000) in either BMS 300 or BMS 360 will be required for those students who are seeking to graduate with a minor in biomedical sciences and who take one of these courses as fulfillment of the requirements.

Master of Science in Biomedical Sciences, Plan A

The traditional Master of Science in Biomedical Sciences, Plan A (http://csu-cvmbs.colostate.edu/academics/bms/Pages/master-science-biomedical-sciences.aspx) is a research-based program and typically takes two to three years to complete. While less comprehensive than a Ph.D., students complete a meaningful and original research project, which culminates in writing and defending a thesis. This option is designed for motivated students who have the ability to develop critical thinking skills and conduct research in one of the three primary areas of study in our department: cardiovascular physiology, reproductive physiology, and neurobiology.

### Master of Science in Biomedical Sciences, Plan B, Reproductive Technology Specialization

The Master of Science in Biomedical Sciences, Plan B, Reproductive Technology Specialization ([http://csu-cvmbs.colostate.edu/academics/bms/Pages/one-year-masters-reproductive-technologies.aspx](http://csu-cvmbs.colostate.edu/academics/bms/Pages/one-year-masters-reproductive-technologies.aspx)) is a one-year, non-thesis study of Assisted Reproductive Technologies (ART), culminating in a research project or internship. It provides students with in-depth laboratory training in *in vitro* embryo production based on a bovine model including techniques such as *in vitro* fertilization, embryo and semen cryopreservation and vitrification, embryo biopsy and micromanipulation, and basic maintenance of an assisted reproduction laboratory and all associated equipment. The curriculum prepares students for careers in applied reproduction, especially careers in human or bovine embryology, as well as application to professional or graduate school.

Ph.D. in Biomedical Sciences

Our Ph.D. Program (http://csu-cvmbs.colostate.edu/academics/bms/Pages/phd-biomedical-sciences.aspx) is research-based and typically takes four to five years to complete, culminating in writing and defending a dissertation. This option is more comprehensive in scope than the research-based Master's degree and is designed for motivated students who have the ability to develop critical thinking skills and conduct original research in one of the three primary areas of study in our department: cardiovascular physiology, reproductive physiology, and neurobiology.

Faculty in the Department of Clinical Sciences participate in training professional veterinary medical students and graduate students. For the veterinary medical student curriculum, students are instructed in the diagnosis, medical and surgical treatment, and prevention and management of domestic and exotic animal diseases. Through field service clinical experience, students receive on-the-farm training in livestock herd health management and production medicine. Our major clinical training center is the Veterinary Teaching Hospital, which operates state-of-the-art primary and referral services in all areas of small animal medicine and surgery, equine, and agricultural animal clinical care.

Undergraduate
No undergraduate major is offered.

Graduate

Graduate Programs in Clinical Sciences
Graduate programs offered in the department lead to Master of Science or Doctor of Philosophy degrees. Particular research focus areas within the department include epidemiology, musculoskeletal diseases, cancer biology, cardiovascular diseases, regenerative medicine, and infectious diseases of animals.

The department also offers a three-year combined master's degree and residency program in large and small animal surgery, anesthesiology, cardiology, dentistry, internal medicine, neurology, oncology, ophthalmology, dermatology, small and large animal sports medicine and rehabilitation, and emergency and critical care medicine. These training programs partially fulfill requirements for board certification in these specialties. Students interested in graduate work should refer to the Graduate and Professional Bulletin and the Department of Clinical Sciences (http://www.cvmbs.colostate.edu/clinsci).

Major in Environmental Health

An Environmental Health degree prepares students for the branch of public health that studies how biological, chemical, and physical factors in natural and built environments impact human health and disease. Students will learn how to help prevent injuries and disease by managing environmental hazards and promoting healthier air, water, soil, homes, workplaces, and communities. The degree program is one of only 31 programs nationwide to be fully accredited by the standards of the National Environmental Health Science and Protection Accreditation Council, and the only such program in Colorado.

The Environmental Health degree prepares students for employment by public sector environmental agencies, private industry, academic institutions, as well as graduate study in medicine, veterinary medicine, and related biomedical and health fields. The basic science requirements for the major will meet admission requirements for accredited medical and veterinary medical schools in North America.

Students will begin their studies with foundational science courses including biology, physics, general chemistry, organic chemistry, biochemistry, microbiology, physiology, calculus, and statistics, and then use these basic sciences as tools to solve environmental health problems. Students are involved in actual and simulated field projects with data gathering and analysis, characterization of environmental health problems, evaluation of alternative solutions, and presentation of results in written and oral formats. All Environmental Health students will complete a professional internship for academic credit with a private sector company, public health agency, or research entity (public or private). Read about Environmental Health student internships on the department website.

### Learning Outcomes

Students will:

- Effectively communicate the health consequences of actions, behaviors, or environmental degradation to the public, political community, legal experts, or the media
- Demonstrate critical thinking and problem solving abilities for environmental health issues as an individual and as a member of a problem solving team
- Integrate knowledge in social, physical, and biological sciences to evaluate environmental health issues
- Apply knowledge of scientific methods to evaluate compliance with environmental health standards and assess risks to workers and the public

### Potential Occupations

Career opportunities include, but are not limited to: environmental health specialist, public health specialist, industrial hygienist, toxicologist, epidemiologist, air and water pollution specialist, hazardous and solid waste specialist, occupational safety specialist, and health educator. More information on career opportunities (http://csu-cvmbs.colostate.edu/academics/erhs/Pages/Careers-Environmental-and-Radiological-Health-Science.aspx) can be found on the department website.

### Major Completion Map

**Distinctive Requirements for Degree Program:**

To prepare for first semester: The curriculum for the Environmental Health Science major assumes students enter college prepared to take calculus. Entering students who are not prepared to take calculus will need to fulfill pre-calculus requirements in the first semester. Those pre-calculus requirements are listed as benchmark courses in Freshman Semester 1 below. LIFE 102 requires high school chemistry; CHEM 111 requires Algebra II as a prerequisite (this prerequisite is met by taking Algebra II by test credit, transfer credit, or placement out of MATH 117 and MATH 118 on Math Placement Exam.

**Master of Science in Environmental Health, Plan A, Epidemiology Specialization**

Department of Environmental and Radiological Health Sciences

Epidemiology is the study of the distribution and determinants of disease in human and animal populations. Diseases are not randomly distributed in populations and there are certain risk factors that influence diseases such as genetics and environmental elements. Epidemiologists work around the world studying diseases, outbreaks and trends in populations to help prevent and control diseases.

This program provides a broad background in theoretical and quantitative epidemiology as well as substantive expertise related to the student’s research topic.

**Master of Science in Environmental Health, Plan B, Epidemiology Specialization**

Department of Environmental and Radiological Health Sciences

Epidemiology is the study of the distribution and determinants of disease in human and animal populations. Diseases are not randomly distributed in populations and there are certain risk factors that influence diseases such as genetics and environmental elements. Epidemiologists work around the world studying diseases, outbreaks and trends in populations to help prevent and control diseases.

This program provides a broad background in theoretical and quantitative epidemiology as well as substantive expertise related to the student’s research topic.

Master of Science in Radiological Health Sciences, Plan A, Health Physics Specialization

Health physics is the discipline associated with using radiation for the benefit of society. This includes applying scientific as well as practical knowledge in order to obtain these benefits without unreasonable risks to man or the environment. The profession has evolved into a necessary part of all programs that involve radiation, including anything from naturally occurring radioactivity to man-made sources of radiation. Sources of radiation range from naturally occurring radioactivity to reactors. Successful persons in health physics have broad backgrounds in physics, biology, instrumentation and have an understanding of risks and risk analysis.

Required course work is structured to provide a sound foundation in the basic skills essential to the health physics profession. Students may concentrate on specific areas of interest through a wide selection of elective courses. Formal course work is supplemented by extensive laboratory exercises, field trips and research.

The M.S. in Radiological Health Sciences, Health Physics Specialization is accredited by the Applied Sciences Accreditation Commission of ABET.

Master of Science in Toxicology, Plan B

Toxicology is the study of the effects of chemicals and other potentially harmful agents on biological systems. The field draws upon the sciences of biology, chemistry, biochemistry, physiology, cell and molecular biology, neuroscience and pathology. The core curriculum provides a comprehensive background in toxicology that is enhanced by elective offerings in the department and the many related basic and health science courses available at CSU.
The non-thesis M.S. in Toxicology, Plan B transitions graduates into MD, DVM, PharmD and other professional programs, as well as prepares students for research careers in industry, government and academia. Graduates can also find professional employment in public and private sector positions such as environmental protection, risk assessment or product safety evaluation.

Ph.D. in Toxicology

Toxicology is the study of the effects of chemicals and other potentially harmful agents on biological systems. The field draws upon the sciences of biology, chemistry, biochemistry, physiology, cell and molecular biology, neuroscience and pathology. The core curriculum provides a comprehensive background in toxicology that is enhanced by elective offerings in the department and the many related basic and health science courses available at CSU. The Ph.D. in Toxicology prepares students for research careers in industry, government and academia. The emphasis is on developing the abilities of the student to progress to a career as an independent scientist.

Major in Microbiology

Microbiology is the study of organisms, many of which are too small to be seen with the naked eye, including fungi, protists, and bacteria, as well as acellular agents such as viruses and prions. Microbiology emerged as a distinct science in the late nineteenth century, with the discovery that microorganisms are the cause of many infectious diseases, and that they play essential roles in the ecosystem and in industrial processes. Much work in this field is directed toward the cure, control, or eradication of disease in humans and animals. Genetically engineered microorganisms can also be used for the production of improved foods and new medicines, as well as for removing toxic wastes and spills from the environment. More recently, some microbes have received considerable attention as potential agents of bioterrorism and biowarfare, and consequently much work is being done to counter such threats.

Students completing the undergraduate Microbiology degree program acquire knowledge and laboratory skills in the structure, physiology, genetics, pathogenicity, ecology, and taxonomy of microorganisms. Required courses in biological sciences, chemistry, physics, and mathematics support the major. Ample opportunities exist for undergraduates to obtain laboratory research experience and many student researchers have presented at conferences and have been awarded research grants or fellowships.
A Bachelor of Science degree in Microbiology positions graduates well for continued education in a professional or graduate degree program or for employment in the field.

**Learning Outcomes**

- **Core Knowledge:** Students will apply and integrate the fundamentals of chemistry, microbial biology, and biochemistry and key principles from the following five core areas of the discipline: immunology, bacteriology, virology, microbial physiology, and microbial genetics.

- **Relevance/Impact:** Students will demonstrate an awareness of issues at the forefront of the discipline and will evaluate the important interaction between microbes and society, from their beneficial use in industrial, biotechnological, and clinical applications to their role as etiologic agents of infectious disease in humans and animals.

- **Communication Skills:** Students will assimilate factual and conceptual information and effectively communicate disciplinary knowledge to both science literate and general audiences through written or verbal presentations.

- **Laboratory Skills:** Students will demonstrate proficiency using microbiological and immunological laboratory techniques employed in clinical, industrial, and research laboratories, and will be able to explain the principles behind the procedures, employ mathematical computations, properly execute the procedures, interpret the results correctly, and analyze the results to draw a conclusion.

**Potential Occupations**

The curriculum meets the requirements for entrance into most professional programs in veterinary and human medicine, and is ideal preparation for students desiring a career as a veterinarian, physician, physician assistant, pharmacist, medical laboratory scientist, optometrist, or dentist. The degree also prepares students for graduate (PhD or MS) studies in various biological sciences, and also provides students with the knowledge and skills to go directly into a career. Career opportunities will continue to grow because microbiology is at the center of complex issues facing our world today, as well as at the forefront of incredible innovation and development. Employment opportunities exist in biotechnology (pharmaceutical, food, beverage, and medical device industries); government public health agencies (CDC, FDA, and state and municipal health departments); and primary research institutions, such as universities.

**Distinctive Requirements for Degree Program:**

---

**To prepare for first semester:** The curriculum for the Microbiology major assumes students enter college prepared to take calculus. Entering students who are not prepared to take calculus will need to fulfill pre-calculus requirements in the first semester. Those pre-calculus requirements are listed as benchmark courses in Freshman Semester 1 below. LIFE 102 requires high school chemistry as a prerequisite; CHEM 111 requires Algebra II as a prerequisite (this prerequisite is met by having Algebra II by test credit, transfer credit, or placement out of MATH 117 and MATH 118 on Math Placement Exam.)

Master of Science in Microbiology, Plan B

The non-thesis Master of Science in Microbiology, Plan B is designed to strengthen the scientific academic portfolio of those seeking professional degrees and provide differentiating preparation for those seeking careers in industry. Students will work side-by-side one of the leading microbiology and immunology departments in the nation as they develop professional knowledge and skills.

With the growth of biotechnology and the increase in technology and specialization in applied microbiological sciences, there is a significant regional and national need for additional educational opportunities for individuals wishing to pursue a career in these industries. In addition, many students wish to pursue additional post-baccalaureate studies due to a variety of interests such as improved preparation for professional (medical, veterinary, DO, etc.) schools or Ph.D. programs. The Department of Microbiology, Immunology & Pathology’s M.S. in Microbiology, Plan B provides an excellent opportunity to meet these needs. As a recognized world leader in infectious disease basic and translational research with over $144 million in active extramurally funded research programs – including a good variety of translational efforts that interface with industrial partners, the MIP department is uniquely positioned in our region to effectively provide this training.

Goals of the Master of Science in Microbiology, Plan B

The overall goal of the program is to give each student a competitive advantage for their future career in industry or their admission into professional school. To develop this advantage the program leverages your undergraduate education and training in life science and provides the advanced knowledge and skills required through:

1. A rigorous curriculum designed to provide cutting-edge knowledge in both theoretical and applied aspects of microbiology, virology, immunology and molecular biology.
2. A strong emphasis on aspects of the discipline that will be useful in real world employment scenarios.
3. A well-rounded curriculum that includes the development of vital professional skills such as verbal and written communication, responsible conduct of research, and biosafety.
4. Active communication with regional and national representatives from the pharmaceutical, biotech, government and public health sectors to ensure that the program’s curriculum remains pertinent and effective.
5. A high level of communication in the program to facilitate active mentoring, networking and career discussions, and access to take full advantage of the cutting-edge facilities and expertise available in the department.

A minimum of 30 credits are required to complete this program.

1 Students must take MIP 618 twice for 1 credit each time, Fall and Spring semesters, for a program total of 2 credits.

2 Students must take MIP 619 twice for 2 credits each time, Fall and Spring semesters, for a program total of 4 credits.

A scholarly paper is required for this degree.

A minimum of 24 credits must be earned at CSU.
The Graduate and Professional Bulletin is designed to provide post baccalaureate students and prospective students with the information which is most essential. It is not a comprehensive source.

A complete listing of graduate programs and degrees may be found by visiting the Graduate School (http://graduateschool.colostate.edu/prospective-students/degrees.aspx).

The policies and procedures in the Graduate and Professional Bulletin apply to all graduate students, except for Doctor of Veterinary Medicine (DVM) students. The policies and procedures for DVM students are found at the DVM Student Resource Page (http://csu-cvmbs.colostate.edu/dvm-program/Pages/dvm-student-resources.aspx).

CSU reserves the right at any time, without notice, to change, modify, or cancel any course, program, procedure, policy, financial requirement, or disciplinary arrangement set forth in this catalog whenever, in its sole discretion, it determines such action to be appropriate. Furthermore, CSU will not be responsible for any failure to present or complete any course or program or to perform any other activity, function, or obligation mentioned in this catalog. Since changes may occur at any time, students must check the relevant website (as noted throughout this catalog). Changes can be found on the Catalog Updates page.

CSU Student Conduct Code

The Student Conduct Code (https://resolutioncenter.colostate.edu/conduct-code) exists to notify students, faculty, and staff of the specific expectations Colorado State University holds related to student behavior and the rights and responsibilities that accompany being a student and participating in student clubs or organizations.

Functions and Organization of the Graduate School

The purpose of the Graduate School is to promote high quality education and specialized training and to further the scholarly research and creative artistry with which such education is intimately linked. The advanced study necessary for graduate degrees requires the discovery of new knowledge, the original application or adaptation of existing knowledge, or esthetic contribution to the culture. Accordingly, graduate students perform research or do artistic work. Similarly, the faculty who are responsible for graduate education are themselves researchers or artists whose responsibilities include the transmission of their own creative skills and abilities to their students. The graduate educational mission of CSU and the research/artistic mission of CSU complement and reinforce each other and go forward in mutual interdependence.

Through the offering of the best graduate education available, CSU seeks to provide the skills and training necessary to a rapidly changing society and also to provide the basis for individual gratification and fulfillment on the part of its graduates.

Graduate degrees are awarded by CSU as an overall institution. Accordingly, CSU has specified that certain academic practices and procedures shall apply to all graduate degrees regardless of the departments and colleges in which study is undertaken. As is the case in most quality universities, some consistency of requirements has been found desirable. The Graduate School is the unit which applies and administers these requirements.

This activity involves several discrete kinds of functions. First, the Graduate School monitors all students’ progress through the entire graduate career, from sending out preliminary information on admissions to graduation. It maintains student records on application, admission, credits earned, formal programs of study, academic standing, progress toward the degree, and graduation. Additionally, it provides a regular flow of information to students and faculty regarding these practices so that the necessary steps can be taken as easily and conveniently as possible.

The Graduate School maintains an active liaison with students both on matters of overall interest and at the level of individual concerns. The former typically involves close contact with the Graduate Student Council, the campus-wide organization of graduate students, or its officers. The latter centers around matters which particular students raise as specific single cases.

The Graduate School collects and maintains information on the condition of the graduate educational mission of CSU. It concerns itself with institution-wide policies and practices that may affect this condition and will implement particular arrangements or make recommendations to the Faculty Council as appropriate.

Formal student involvement in the Graduate School proceeds through the Graduate Student Council. The Student Council consists of one student representative and one alternate from each department offering programs leading to advanced degrees. The Council elects its own officers and nominates graduate students for memberships on Faculty Council and Graduate School committees.

Sequential Degree Programs

CSU’s graduate admissions program is designed to foster excellence in scholarship and promote diversity within the student population while assuring equal opportunity to all applicants.

The ultimate criterion for admission is applicant potential for attaining an advanced degree at CSU. However, the resources of CSU are limited and not all applicants who possess this potential can be admitted. Thus, selection is made taking into account a range of factors: past academic performance as indicated by transcripts of formal collegiate work, degrees completed, standardized examination scores (for example, the Graduate Record Examination or Graduate Management Admission Test), geographic residence, leadership qualities, recommendations
from qualified references, economic status, ethnic origin, and racial background.

CSU does not set quotas for people possessing particular ethnic, gender, or racial characteristics. However, the vitality of CSU and the quality of the educational experience to be enjoyed by all students depend in part on the existence of a diverse student population. Thus, CSU actively seeks applicants from many backgrounds and with diverse characteristics. The institution is committed to a truly heterogeneous University community.

**Application: U.S. Citizens or Permanent Residents**

Students apply online (http://gradadmissions.colostate.edu/apply). In addition to the online application, a non-refundable application fee must be electronically submitted.

The on-line application will be electronically submitted to the Office of Admissions and then forwarded to the appropriate academic departments. With this system, most documents are uploaded directly by the applicant. Regarding letters of recommendation, recommenders will be notified and prompted to provide a recommendation letter through the online system. The letter of recommendation will be automatically processed and submitted to the student’s online file.

The following must be sent directly to the Office of Admissions at Colorado State University, 1062 Campus Delivery, Fort Collins, CO 80523-1062.

1. One official transcript of all collegiate work completed post-high school. Additionally separate transcripts are not required for study abroad credits if the GPA and credits are recorded on the transcript of the university that sponsored the study abroad experience. CSU transcripts are not required. Training course transcripts from branches of the U.S. military that show credit received with neither grades nor degrees awarded are exempt from the transcript requirement.
2. Test scores such as GRE or GMAT, if required by department, should be submitted with institution code 4075.
3. Any other materials that individual departments or programs may require of applicants.
4. Regardless of citizenship, applicants may be required to demonstrate proof of English language proficiency, if they do not have a degree from an institution where the primary language of instruction is English.

General deadlines for the receipt of complete applications are as follows: Fall Semester, April 1; Spring Semester, September 1; Summer Term, January 1. Please submit the on-line application and all supporting documents by the appropriate date. Note that individual departments may have earlier deadlines for certain programs. Please consult appropriate sections of this Bulletin or a department contact person. Applications completed later than these published deadlines may be considered depending on space and resources available. Late applications that cannot be considered will be updated by the Office of Admissions to a later semester or term. Except for Integrated Degree Program (IDP) Admissions, applications cannot be accepted more than fifteen months in advance of the term in which study is to begin.

Students who wish to be considered for fellowships, assistantships, or other forms of merit- or competency-based financial support may be subject to earlier deadlines. See Application for Financial Support.

The application fee is not refundable even if the application is withdrawn or admission denied, nor is it applied to tuition and fees if the applicant subsequently enrolls. The non-refundable application fee must be received by the Office of Admissions. Your application cannot be submitted until the fee is received.

Only persons with bachelor’s degrees from colleges or universities accredited by one of the major regional accrediting agencies are eligible to apply. Degrees from schools which do not possess overall, institutional accreditation or which have only specialized accreditation cannot be accepted. This policy does not apply to admission for combined degree programs (CDPs, see Sequential Degree Programs), however, CDP students must earn their bachelor’s degrees prior to, or concurrent with, the award of their graduate degrees.

An undergraduate grade point average of 3.000 (A = 4.000) is required by CSU regulation for admission.

The various departments may have requirements in addition to or more stringent than those of CSU. Higher undergraduate grade point averages may be required, specific GRE minimum scores may be specified, or GRE advanced tests may be required, for example. Once again, applicants are strongly urged to contact the department in which they intend to study.

CSU may waive its 3.000 minimum undergraduate grade point average requirement under unusual circumstances or if the applicant is applying through Track II Admissions (see below). Applicants must present strong countervailing evidence that successful completion of a degree program is likely. Examples of the kinds of evidence that might be considered are high scores on the GRE aptitude test, high scores on the GRE advanced test, excellent letters of recommendation, relevant professional experience, and other indicators of exceptional motivation and performance. A positive recommendation by the department is required in such cases. Some departments may waive their specific requirements under similarly unusual and compelling circumstances. However, they are not required to do so and many cannot, due to space and resource considerations.

Meeting the minimum CSU or department standards does not entitle an applicant to admission. Meeting such standards only insures consideration of the application. Since CSU cannot accommodate all who meet the minimum standards, it reserves the right to select individuals for admission on the basis of merit in such a way as to promote the best interests of CSU and the society as a whole and to maximize the potential for individual accomplishment.

Persons not seeking advanced degrees may be recommended for admission as non-degree students if space permits and if they meet the academic admission requirements. Advanced course work, research experience, teacher recertification, and specialized training are among the objectives of students requesting admission in this category.

Students who have not been admitted to graduate study but who take courses on some other basis have no assurance that such courses will be acceptable in a degree program. Credits taken prior to admission to Graduate School may be allowed, but acceptance of any courses in a graduate degree program is at the discretion of the student’s graduate committee and the Graduate School and will not be calculated in the student’s GPA.
Courses taken by CSU undergraduates may, under certain circumstances, be subsequently credited toward graduate degrees at CSU. Undergraduates who enroll in 500-level courses which are not applied toward the bachelor's degree may request that an exclusion statement be placed on their academic records for no more than 9 credits. Students cannot exclude any courses below the 500 level under this policy. Courses at the 600 level are automatically excluded from use for an undergraduate degree.

A request for exclusion must be filed with the Degree and Transfer Evaluation Unit of the Registrar’s Office, Centennial Hall, Room 100, no later than the end of the schedule change period of the term in which the excluded course is taken, or for Integrated Degree Program (IDP) students, excluded courses must appear on the formal program of study (GS form 6) filed during the first semester after Graduate School admission.

Permission to exclude courses from the bachelor’s degree does not assure acceptance of this credit toward a graduate degree program. Both departmental and Graduate School approval is required at the time of filing the formal program of study.

Those with bachelor’s or advanced degrees who desire to complete requirements for certification as teacher, administrator, counselor, reading specialist, or vocational certification must contact the School of Education. Individuals seeking professional certification in other areas must contact the departments concerned.

The submission of any false information or fraudulent documents in connection with the application process is grounds for rejection of the application or dismissal from the Graduate School regardless of the nature of other credentials.

Track II Admissions

Track II admissions are available only to individuals who have at least five years of appropriate professional experience following the award of a baccalaureate degree and whose undergraduate GPA is below 3.00.

The on-line application will be electronically submitted to the Office of Admissions and then forwarded to the appropriate academic departments. In addition to the on-line application and a non-refundable application fee that must be submitted, the following must be sent directly to the department in which the student plans to study (refer to the addresses in the Directory for Department and Program Contact Persons (http://graduateschool.colostate.edu/prospective-students/degrees.aspx)).

1. One official transcript of all collegiate work completed (CSU transcripts are not required). Training course transcripts from branches of the U.S. military that show credit received with neither grades nor degrees awarded are exempt from the transcript requirement.
2. Three letters of recommendation written by individuals in at least two of the following categories:
   a. Applicant’s previous or current college/university instructors.
   b. Applicant’s previous or current, immediate professional supervisors.
   c. Observers, other than supervisors, who can verify the specific impact of the applicant’s professional or intellectual expertise. Letters from friends, relatives, or character witnesses will be considered only supplemental to the three required references.
3. A written “statement of purpose” that contains:
   a. A summary of long-term professional or personal goals.
   b. A statement regarding the applicant’s educational goals.
   c. A statement indicating how this learning will contribute to the applicant’s long-term goals.
   d. A list of factors that led the applicant to consider CSU for graduate study.
4. A completed resume that contains the following:
   a. Record of all collegiate work, including names of institutions, periods of attendance, and degrees earned.
   b. Record of all professional employment including dates of service (including military).
   c. List of any special skills or competencies (including certifications or licensures).
   d. List of publications, exhibitions, prizes, awards, or other recognitions.
   e. List of service activities (including community and charitable).

Plan C

Applicants to Plan C master’s programs should consult department requirements for submission of standardized test scores.

Application: International Students

Application procedures are similar to those for U.S. citizens or permanent resident students. Refer to U.S. Citizens or Permanent Residents information for instructions.

The following materials must be sent directly to the Office of Admissions at Colorado State University, 1062 Campus Delivery, Fort Collins, CO 80523-1062.

1. An official transcript of all collegiate work completed along with a certified translation into English.
2. Scores on the Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS), or Pearson Test of English (PTE) Academic. Test scores should be submitted with institution code 4075. Integrated Degree Program (IDP) Admissions are not required to take the TOEFL, IELTS exam or the PTE Academic exam.
   a. When the CSU graduate degree program is taught in the student’s native language, the TOEFL, IELTS, or the PTE Academic requirement will be waived.
   b. Students are exempted from the TOEFL, IELTS, or PTE Academic requirement if the official language of their country is English or if they have recently earned a degree at an American university.

Required items for Immigration Document Insurance

These items are not required for the application review process, but will be required if officially admitted. The following materials must be sent directly to the department in which the applicant plans to study (see Programs and Degrees webpage (http://graduateschool.colostate.edu/programs) for the mailing address).

1. Certified proof of financial support – Graduate Student Certification for Issuance of Immigration Document (GS3F form) and supporting financial documents.
2. Passport copy
Departmental requirements for additional materials such as standardized tests (e.g. GRE or GMAT) are the same as for U.S. students. Regulations regarding deadlines and application fees are likewise the same as for U.S. students.

Information on application deadlines and application fees is contained in the U.S. Citizens or Permanent Residents section.

The U.S. Bureau of Citizenship and Immigration Services requires CSU to have proof of financial support before immigration documentation can be issued. Immigration documentation is needed to obtain a visa. All international students and their accompanying dependents are required to maintain adequate health insurance during their stay at CSU.

Only persons with degrees equivalent to U.S. bachelor's degrees are qualified to apply for admission except for Integrated Degree Program (IDP) applicants described above. Further, it is a CSU regulation that international applicants should be among the top students in their classes.

CSU requires that proficiency in English language be demonstrated either by the TOEFL, IELTS, or PTE Academic tests prior to admissions. The minimum TOEFL score for admission without condition is 550 (paper-based), or 80 (internet-based). The minimum IELTS score for admission without condition is 6.5. The minimum PTE Academic Score for admission without condition is 58. Official scores, taken within two years prior to admission, must be submitted directly from the testing agency.

To be considered for conditional admission, a student must have a minimum TOEFL score or 475 on the paper based test or 50 on the internet based test or minimum IELTS score of 5.5 or PTE scores from 40-57. After receiving conditional admission, the student must satisfactorily complete the INTO CSU Academic English Program. Enrollment in regular CSU academic courses is at the discretion of the INTO CSU Academic English Program. Approval of both the department and the Dean of the Graduate School is necessary for such conditional admission.

Generally, however, applicants should achieve satisfactory TOEFL, IELTS or PTE Academic scores before arriving on the CSU campus.

The individual departments may have requirements or standards in addition to or more stringent than those of CSU. Students must contact the department in which they intend to study for additional information. Consult the Department Head or Program Contact Persons for the proper addresses.

The paragraphs in the preceding section on U.S. Citizens or Permanent Residents on academic requirements, how students are selected for admission, non-degree study, previous undergraduate work at Colorado State, certification, and the consequences of presenting any materials that are not genuine, also apply to international students.

**Language Requirements**

English is the language of instruction at CSU. Adequate knowledge of that language is expected. The various departments generally evaluate students in this regard, and they may require students to secure remedial instruction if necessary.

Students whose native language is not English must demonstrate capability through the TOEFL examinations or other means (see above).

Some departments may require a knowledge of one or more foreign languages for advanced degrees. For information the student should contact the department.

### Personal Identifier/Social Security Number

The personal identifier for all CSU students is the CSUID. The CSUID is a nine-digit unique numeric identifier that begins with the digit 8 and is assigned by the ARIES student information system. The Social Security number (SSN) is no longer used at CSU as a personal identifier.

All students are requested to submit a Social Security number (SSN) at the time of admission or before initial enrollment at CSU. The Social Security number is maintained as a secure data element in the student information system and is not accessible as directory information or to unauthorized persons. International students are encouraged to file for a Social Security number although they are not eligible for Social Security benefits. Students’ disclosure of the social security number is required for financial aid purposes, employment, and state and federal reports required by law.

The Social Security number is released to agencies or individuals outside CSU only at the request of the student or in accordance with federal and state requirements in regard to financial aid awards; Internal Revenue Service for student employee salary reporting and 1098T/1098E reporting; and State Controller’s debt collection procedure. CSU has strict policies protecting and prohibiting the use of SSN and uses every reasonable effort to hide and protect SSN.

### Readmission

If there is an interruption in successive semester-to-semester on-campus resident instruction registration, enrollment will lapse and you will need to reapply. File GS Form 1B to apply for readmission at least two months prior to the term that you plan to return. A check or money order for $150.00 must accompany the GS Form 1B.

Please note that registration through Continuing Education (CSU Online), Guest Registration, Alternate Site, or an off-campus instruction mode (including Distance Degree) does not constitute readmission.

The GS Form 1B (http://graduateschool.colostate.edu/documents/GS1B.pdf) is available online.

### Transfer of Graduate Credit from Other Institutions

Credit may be transferred to a graduate program at CSU with the approval of advisor, committee, and Graduate School. There is no right to transfer credits; each case is assessed individually and accepted or rejected on its merits. The number of credits that may be transferred is limited. See requirements for the number of credits that may be earned at CSU after
admission to the Graduate School under the descriptions of the various degree programs and in Credit Requirements section.

Individual credits used to fulfill requirements for previously earned degrees are not accepted in transfer.

Requests to transfer graduate credit earned at another university must be accompanied by official transcripts. Courses accepted for transfer must be at the equivalent level of CSU’s regular courses at the 500 level or above. Arrangements for transfer of credit are made when the program of study is submitted (see Program of Study). In general, credits transferred must be part of a graduate curriculum. However, credits that are part of a post baccalaureate professional curriculum in Medicine, Veterinary Medicine, Dentistry, Pharmacy, Law, or Divinity may be so transferred if they address the intellectual bases of a graduate discipline.

Credits earned at institutions not accredited by one of the major regional accrediting agencies are not acceptable for transfer; except that a CSU graduate program may petition the Graduate School to have graduate level credits earned from a foreign institution accepted as transfer credit. Grades in courses accepted for transfer will not be included in calculation of the grade point average. No course will be accepted for transfer with a grade less than B.

CSU may establish bilateral cooperative agreements with other institutions within the Colorado State University System (CSU-Pueblo (http://www.csupueblo.edu/Pages/default.aspx) and CSU-Global (https://csuglobal.edu)) that permit transfer to CSU of up to half of the total required credits for a specific master’s degree.

Procedures

1. Any bilateral agreement must be formal, proposed by an academic department, signed by the Provost/Academic Vice-President, and approved by the Committee on Scholarship, Research and Graduate Education (COSRGE). It must refer to a particular named master’s degree now offered by CSU.

2. Courses offered for transfer under these arrangements must be:
   a. The exact equivalents of particular courses at CSU and so certified by the Faculty Council Curriculum Committee.
   b. Taught by persons who are Faculty or Affiliate Faculty of CSU.

3. Persons who seek to avail themselves of such transfer privileges must be admitted to graduate school at CSU. No more than nine credits offered for transfer may be earned prior to such admission. This means that students must apply for and secure admission well in advance of actual transfer to CSU.

4. Persons who transfer credits under such a bilateral agreement may also transfer credits under the normal procedures as described in this Bulletin. Such transfers may not exceed six credits and the total number of transferred credits, under bilateral agreement and normal procedure combined, may not exceed half the total required for the master’s program.

5. Credits submitted or transferred under such special agreements must be earned by a person enrolled as either a graduate student or a post baccalaureate student at the cooperating institution. Credits earned prior to the award of a bachelor’s degree or those used to fulfill requirements for a previously earned degree are not accepted.

6. Additional regulations and restrictions as described in this Bulletin under the section Transfer of Graduate Credit from Other Institutions also apply to bilateral agreement transfers.

Credit for Graduate Courses Taken at CSU Prior to Admission to a Graduate Program

Certain CSU courses taken after receipt of a bachelor’s degree but prior to formal admission to a graduate program may contribute to graduate degree requirements (see Credit Requirements for the degree pursuing). Grades earned in such courses will not be included in the calculation of grade point averages. No such courses will be accepted, however, unless a grade of B or better has been earned.

Students of Veterinary Medicine

A student in the College of Veterinary Medicine and Biomedical Sciences who holds a bachelor’s degree and who meets the requirements for admission to the Graduate School may pursue work concurrently toward the degrees of Doctor of Veterinary Medicine and Master of Science if approved in advance by the Dean of the College of Veterinary Medicine and Biomedical Sciences and the Dean of the Graduate School. Credits applied on one degree may not be used in meeting requirements for the other. Refer to the Doctor of Veterinary Medicine program (http://csu-cvmbs.colostate.edu/dvm-program/Pages/default.aspx) or the Graduate School (http://www.graduateschool.colostate.edu) for more information.

Integrated Degree Program and Integrated Degree Programs Plus Admissions

Exceptional undergraduate students may be recruited to integrated bachelor’s/master’s or bachelor’s/doctoral degree programs (IDPs). An IDP partners an undergraduate and graduate program within or between departments, programs, or SAUs in the same or differing colleges. The graduate degree will be awarded after or concurrently with the award of the Baccalaureate degree. There are two types of IDPs:

1. The IDP is for undergraduate programs that have a 120 degree credit requirement;
2. The IDP+ is for undergraduate programs that have a 121, or more, degree credit requirement.

Undergraduates enrolled in a bachelor’s degree program at CSU may apply for admission to the appropriate IDP program if they meet the following criteria students must:

1. Complete at least 90 credits of course work toward their first bachelor’s degree.
   a. Students enrolled in IDP+ programs may double count one through nine 500-level credits toward both their bachelor’s/ master’s or their bachelor’s/ PhD degrees when the credit requirements for the undergraduate degree programs range respectively between 121 through 129 credits, or more. For example, a maximum of 5 credits could be double counted for a 125-credit degree and a maximum of 9 credits could be double counted for a degree program with 129 or more credits. (This process is managed by the Registrar’s Office; the maximum number of credits that may be double counted is 9.)
   b. Students enrolled in an IDP may not double count credits. However, prior to earning 120 credits, these students may enroll for a maximum of nine credits of graduate-level course work that may be applied toward the graduate degree, provided such course work is not used to meet bachelor’s degree requirements. As undergraduates, students pay the undergraduate tuition rate for these credits. (This process is managed by the Registrar’s Office.)
2. Complete or enroll in 9 credits of upper division level courses required or listed within their majors by their senior year.
3. Maintain a cumulative GPA of 3.000 or above.

In addition to the online application and the application processing fee, students applying for admission to either IDP program must send the following materials directly to the department in which they plan to study:

1. Three letters of recommendation written by individuals in each of the following categories:
   a. Applicant’s undergraduate advisor.
   b. Applicant’s instructor in at least one course within his or her major who is not his or her advisor.
   c. Applicant’s instructor in a course outside of his or her major field of study.
2. A written “statement of purpose” that contains:
   a. A summary of long-term professional or personal goals.
   b. A statement regarding the applicant’s educational goals.
   c. A statement indicating how participating in the Track III degree program will contribute to the applicant’s long-term goals.
3. A completed resume that contains the following:
   a. Record of all professional employment including dates of service (including military).
   b. List of any special skills or competencies (including certifications or licensures).
   c. List of publications, exhibitions, prizes, awards, or other recognitions.
   d. List of service activities (including community and charitable).

To be eligible to offer an IDP or IDP+, a specific program must submit, and have approved by the Graduate School, a one-time Memorandum of Understanding (MOU) providing the following information and agreements. Contact the Graduate School for the MOU format.

1. List participating undergraduate and graduate program codes.
2. All students recommended will have a GPA of 3.0 or higher.
3. 21 credits must be earned after admission to the Graduate School for a master’s degree and 62 credits for a PhD.
4. Students will be advised of the following:
   a. The semester after the students have earned 120 or more credits at the undergraduate level the student will be switched to graduate standing and will begin paying graduate tuition and fees. They will lose all undergraduate institutional and scholarship aid such as Pell, COF and Boettcher awards.¹
   b. Their Undergraduate Degree Plans (DARS) will no longer track degree completion in a comprehensive manner, so the student and advisor will need to work with their designated Degree Analysts in the Registrar’s Office to ensure timely and accurate graduation from the bachelor’s degrees.
5. Students must file their programs of study (GS form 6) by the end of the second week of the first semester after Graduate School admission.
6. Students who are dismissed or drop out from the Graduate School, and who are still in good standing within their undergraduate programs, will be permitted to complete their undergraduate degrees. Students will be required to make contact with the Graduate School for the next steps to reactivate their undergraduate status. To support undergraduate degree conferral for students who do not complete the IDP/IDP+, departments must submit an explicit plan for undergraduates showing how they will allow students to graduate if they have completed: 1) All non-elective courses required for that undergraduate degree, and 2) The minimum number of undergraduate credits required by the undergraduate degree program. These credits may consist of both graduate and undergraduate coursework. The graduation process may require additional paperwork with the Registrar’s Office.
7. Students must complete applications for graduation (GS25) from the Graduate School either concurrently with, or subsequent to, completing the bachelor’s degrees.

¹ Departments offering IDP programs with unique requirements, incentives or other elements in addition to, or instead of, those stated above must request approval from the Graduate School for the specific terms they wish to address. The final terms of the agreement will be stipulated in an MOU between the Graduate School and the Department.

Sequential Degree Programs

Sequential degree programs (SDPs) partner an undergraduate and a graduate program within or between departments, programs, or SAUs in the same or differing colleges. The graduate degree will be awarded only after the award of the Baccalaureate degree. Undergraduate students complete a SDP application created by the partnering undergraduate and graduate programs. The timing of the application and its requirements are defined by the partnering programs and include minimum requirements related to criteria such as GRE, recommendations, and research experience. The minimum GPA acceptable for entrance into a SDP is 3.00. Students may be contingently admitted into the SDP at any point the partnering programs of the SDP so choose. Students must complete the Graduate School application and the application fee. Final admission to the SDP is conferred when the students meet the minimum SDP and Graduate School admissions criteria upon completion of their bachelor’s degrees. To be eligible to offer a SDP, a specific program must submit, and have approved by the Graduate School, a one-time Memorandum of Understanding (MOU)¹. The minimum requirements for contingent graduate admission into the SDP must be included in the MOU.

Undergraduate students in SDPs may enroll for a maximum of nine credits of graduate-level course work that may be applied toward the graduate degree, provided such course work is not used to meet bachelor’s degree requirements. As undergraduates, students pay the undergraduate tuition rate for these credits. (This process is managed by the Registrar’s Office.)

¹ Departments offering SDP programs with unique requirements, incentives or other elements in addition to, or instead of, those stated above must request approval from the Graduate School for the specific terms they wish to address. The final terms of the agreement will be stipulated in an MOU between the Graduate School and the Department.

The earning of a graduate degree is a wide-ranging, challenging intellectual experience. It certainly involves mastery of important subject matter. It may require the possession of knowledge in addition to that acquired through course work and also the ability to creatively synthesize and interpret that knowledge. Further, research or artistic projects are often an integral part of graduate study as may be field responsibilities or service obligations. Since graduate work thus extends beyond completion of course work in several ways, it is often the case that some form of culminating event, be it comprehensive examination, thesis, or other undertaking is part of the degree program.

The graduate experience, involving as many dimensions as it does, requires careful and comprehensive planning. This planning is done by the student, the advisor, and the graduate committee. Of course, it should take place early in the graduate career. The necessity for planning underlies the advisory system, the limitation on the number of credits that may be transferred, and requirements that certain amounts of the work in any degree program must be completed at CSU after admission to the Graduate School. These are all explained below.

Comprehensive planning assures that the greatest possible benefit will be gained from graduate study. Depending on discipline, career objectives, and particular curricular needs, unique study plans may be arranged for students on an individual basis.

Just as the scope of activities involved in earning a graduate degree is extensive and complex, so is the necessary evaluation of student performance. Students must not only demonstrate the ability to earn satisfactory grades in their courses, but must also show that they possess those more elaborate abilities and skills essential to the various academic and professional fields. The advisor and graduate committee have the primary responsibility for assessing these broader dimensions of student progress.

The requirements set forward in this section are those of CSU as a whole. However, the various programs may have additional requirements not listed here. These requirements must also be met in completing a degree. Please consult the department for appropriate information. See the Areas of Study within the Graduate Degrees (http://graduateschool.colostate.edu/programs) section in the Graduate School website.

Summary of Procedures for the Master's and Doctor of Philosophy Degrees

NOTE: Each semester the Graduate School publishes a schedule of deadlines. Deadlines are available on the Graduate School website. Students should consult this schedule whenever they approach important steps in their careers.

The Advisory System

Since thoughtful planning is vital to a graduate student career, a comprehensive arrangement for advising has been established. Each student is initially assigned a faculty member as advisor by the head of the department in which the major is pursued.
A permanent advisor will be selected from among departmental faculty once initial entry to the program has been completed. (The temporary advisor may assume this role if appropriate.)

The advisor is the chief source of advice in the planning process. This individual works closely with the student throughout the graduate career on all matters related to the degree program.

A close, cordial, and professional relationship is therefore of the utmost importance. Both student and advisor should work at achieving mutual understanding and respect.

Except for those pursuing Plan C master’s degrees, each student has an individual graduate advisory committee. Members of the committee should be chosen on the basis of the student’s interests, the student's experience with faculty members, and the advisor’s knowledge and expertise. The makeup of a graduate committee must be approved by the department head and, of course, agreed to by the potential members themselves. It is well for the student to assume the responsibility of securing these approvals and agreements.

The purpose of the committee is to make available to the student a broad range of knowledge and expertise. It aids in general advising of the student and assists in planning the major elements of the program. The committee also evaluates student progress throughout the graduate career. It may provide assessments at various stages and it administers the final examination. The committee is not responsible for reminding students of published deadlines nor for monitoring procedural details. The student should manage such matters independently.

The committee must consist of at least three faculty members for a master’s degree program and at least four for a doctoral degree program. The members are as follows:

1. The advisor who serves as chairperson of the committee and who must hold academic faculty rank as a professor, associate professor, or assistant professor of any appointment type within the department or program granting the degree;
2. One or more additional members from the department;
3. Any non-departmental faculty member who may be appropriate; and
4. One member from an outside department who, appointed by the Dean of the Graduate School, represents the Graduate School. The outside committee member appointed by the Dean of the Graduate School must hold a regular, special, transitional, joint, or emeritus/emerita faculty appointment at CSU. The outside member should serve as an impartial external evaluator on the committee, ensuring quality of scholarship and fairness in process.

Due to the interdisciplinary nature of some scholarship at CSU, potential conflicts of interest may not be avoidable but should be disclosed to the Dean of the Graduate School and managed as soon as they arise. Individuals who are not academic faculty but who have special expertise may serve on committees in addition to the prescribed members, but may not vote regarding examination results.

Plan C master’s students are required to have an advisor but not a committee.

The advisor is identified and the committee is appointed through filing a GS Form 6 (http://graduateschool.colostate.edu/policies-and-procedures/forms/#GS5) with the Graduate School. It is the student’s responsibility to identify an advisor and a committee, all of whom are willing and qualified to serve. The student’s department chair or designee will use his/her best efforts to facilitate selection of the committee and subsequent changes therein. With notification, temporary replacement of a member may be arranged. A member, including the advisor, may resign from the committee in accordance with any applicable provisions in the student’s departmental code. In such cases, the affected student and his or her department chair will be notified promptly by the departing member. It is then the student’s responsibility to obtain a replacement. Any permanent changes are recorded through the filing of GS Form 9A (http://graduateschool.colostate.edu/policies-and-procedures/forms/#GS9A) with the Graduate School.

Persons who are not academic faculty (as defined in the Academic Faculty and Administrative Professional Manual (http://facultycouncil.colostate.edu/faculty-manual)) of CSU may be appointed full voting members of graduate student advisory committees in the following manner. A person may be nominated for membership on a specific student’s committee. This is accomplished by submission of a resume and supporting material to the department head. If, using procedures and criteria outlined in the departmental code, the department head judges the appointment appropriate, and shall forward a recommendation and all supporting materials to the Dean of the Graduate School. The Dean of the Graduate School shall bring the nomination to the appropriate Faculty Council Committee, which shall act on the nomination.

A person so approved shall be eligible to serve on the committee for the duration of the student’s work toward the degree. The Graduate School shall maintain a roster of such appointments. Although approval is granted with respect to a particular student’s committee, such members may serve on other student committees in the same department with additional departmental approval provided that such service shall not extend beyond five years of the original appointment.

Such non-faculty appointments are subject to the following restrictions.

1. Such an appointee may not serve as an outside member of graduate committees.
2. Service may not be as the sole advisor of the student.
3. The appointee must have a degree equivalent to that sought by the student and must not be a student at CSU.
4. No more than one such person may serve on any graduate student’s committee.
5. The person appointed should be an addition to the minimum number now required on graduate committees and not a replacement for required faculty. The advisor may invite others to participate in the examination in a nonvoting, advisory capacity.

**Program of Study**

Each student must prepare a Program of Study, a document which lists all courses taken in pursuit of the degree. This is the formal statement of what is done to achieve the degree, the summary of all academic planning. The advisor and the committee are heavily involved in the development of the Program of Study. The Program of Study must be filed with the Graduate School before the time of the fourth regular semester registration. Students who fail to meet this requirement may be denied subsequent registration. For Integrated Degree Program (IDP) Admission students, program of study forms (GS Form 6 (http://graduateschool.colostate.edu/policies-and-procedures/forms/#GS6)) must be filed by the end of the second week of the students’ first semester after admission to Graduate School. Courses listed and approved on this form for graduate requirements will be automatically excluded from the undergraduate degree program of the student. The Graduate School reviews each program of study (GS Form 6 (http://
This page likely contains educational content related to academic policies and procedures. It discusses the Program of Study, including how changes should be communicated and the importance of planning early in the graduate career. It emphasizes the need for continuous registration to extend probationary periods. The text also outlines the standards for maintaining good academic standing, including minimum grade point averages and satisfactory progress. Additionally, it covers the process for recommending dismissal from the program, including the role of the student's graduate advisory committee. The page mentions the importance of academic performance and the potential consequences of not meeting academic expectations. All information is tailored to graduate students at Colorado State University, with specific links to further resources for guidance and policy details.
department head has the basic responsibility for the implementation of this policy. Note that only courses with a grade of B or better may be accepted as transfer courses and such courses are not included in the student's calculation of grade point averages.

For thesis, dissertation, research, and independent study graduate courses, the number of student credit hours earned will be determined using a base rate of 48 hours of student effort per credit hour. The faculty advisor, or other department official, shall estimate the total number of hours of student effort required over the length of the semester. This effort shall include consultation with the advisor, as well as library, laboratory, field, or studio work. The total number of hours shall be divided by 48 and the resultant quotient (rounded off to a whole number) shall define the number of credits to be awarded.

Diagnostic Examination
A diagnostic examination is administered by a number of departments before the first registration to determine the areas in which there may be inadequate preparation. Results from the diagnostic examination are used in planning remedial course work when needed and in preparing the Program of Study (GS Form 6 (http://graduateschool.colostate.edu/policies-and-procedures/forms/#GS6)).

Final Examinations
Each candidate for a degree, except for Plan C master's students, must pass a final examination which must be held by the published deadlines of the student's graduating term. The examining committee is normally the student's graduate committee with the advisor serving as chairperson. If a department chooses to administer a common examination to its Plan B master's candidates, a departmental examining committee may serve this function. Plans and arrangements for a common final examination for Plan B candidates must be on file with the Graduate School in advance of the examining date.

Voting at all final oral examinations shall be limited to the members of the student's committee, and a majority vote is necessary to pass the examination. A tie vote is interpreted as failure to pass the examination. Committee members who are not academic faculty do not have a vote on the final examination.

Providing the committee approves, a candidate who fails the final examination may be reexamined once and, for the reexamination, may be required to complete further work. The reexamination must be held no later than 12 months after the first examination. The examination must not be held earlier than two months after the first examination unless the student agrees to a shorter time period. Failure to pass the second exam results in dismissal from the Graduate School.

The student is responsible for taking the Report of Final Examination (GS Form 24 (http://graduateschool.colostate.edu/policies-and-procedures/forms/#GS24)) to the examination and returning it, completed and signed, to the Graduate School Office within two working days after results are known; this must be by the published deadline of the student's graduating term.

Participation in oral examinations by the student and/or one or more members of the examining committee may be via electronic link so long as all are participating simultaneously and all committee members and the student have agreed to this in advance.

Time Limit
There is a ten-year time limit for completion of the master's or doctoral degrees.

Courses to be applied toward fulfilling the requirements for the master's and doctoral degrees, including any which may have been transferred from another institution, must have been registered for and completed within the ten years immediately preceding the date of completion of requirements for the degrees.

Continuous Registration
All students admitted to a graduate program at CSU are required to be continuously registered in the fall and spring semester throughout their degree programs. This policy applies from the time of first enrollment through the graduation term. Students may fulfill this requirement by registering for any graduate credit-bearing course (regular or non-regular). As an alternative, students may opt for a Continuous Registration (CR) status. Registration for CR status is accomplished in the same way as registration for courses. Section ID numbers appear in the class schedule under the CR subject code. Students registering for CR will be assessed a fee for each semester of CR registration. Students who register for CR on or after the first day of the term will be charged a Late Registration Fee. Students must be either enrolled for at least one credit or must register for CR during the term (fall, spring, summer) they complete their degree requirements.

Students enrolled in CR have access to library services and campus computing services; they pay a mandatory University Technology Fee. CR students may also choose to purchase CSU student health insurance and/or access the CSU Health Network for a fee.

The maximum number of CR semesters a student may enroll in during his/her degree program is ten (10). When a student is in her/his first (1st), fourth (4th) and eighth (8th) semesters of CR, the student's advisory committee is required to review the student's progress and intentions related to degree completion, with input from the student. Upon completion of the review, a report that provides a student plan which includes academic expectations and an accompanying timeline for satisfactory progress for the degree will be forwarded to the department head/chair and student. A registration hold will be placed on a student with more than 10 semesters of CR unless the student's department head has submitted the student's progression plan and a petition to the Dean of the Graduate School to extend the number of CR semesters to a specific number beyond 10.

Students may register for CR for the following reasons:

1. They do not require the use of University resources (other than those listed above), but are actively working on their degree requirements. Students who are utilizing CSU facilities to conduct their research must not enroll in CR; instead, they must enroll in the appropriate number of research, thesis or dissertation credits. See Curricular Policies and Procedures Handbook, Appendix D, for information regarding faculty contact time needed to generate credit hours: http://curriculum.colostate.edu or

2. They will not be working on their degree requirements, but will be leaving the University for professional or personal reasons (e.g., mission service, medical or parental leave, work) or an official assignment for CSU.

Subject to the established time limits for the earning of graduate degrees and the various academic requirements, CR registrants need not apply
for readmission should they wish to take additional graduate courses. Such students are ensured a place in their graduate programs as long as they remain in good academic standing. However, students who do not register will need to apply for readmission for their next semester of enrollment.

The availability of the CR option shall not supersede any other registration requirements to which students may be subject at the University, Department, or Program level. For example, the credit bearing registration requirement for graduate assistantships applies to all students appointed to these positions. Similarly, some units may adopt more stringent CR policies than that expressed here.

**Graduate Enrollment Requirement**

Graduate degree candidates must be either enrolled for at least one credit or must register for CR during the term (fall, spring, or summer) they will complete their degree requirements.

**Posthumous Degree**

In exceptional circumstances, the Board of Governors of Colorado State University may award degrees posthumously (http://catalog.colostate.edu/general-catalog/academic-standards/graduation/#undergraduatedegrees).

**Evaluation of Graduate Students and Graduate School Appeals Procedure**

**Evaluation of Graduate Students**

Graduate students are students, apprentices to the professions, and, when they hold an assistantship or other paid position, student employees. Each of these roles has its own rights and responsibilities. Graduate students are responsible for knowing any special expectations and requirements of their department and program. They are expected to remain in good academic standing by making satisfactory progress toward the degree (see Scholastic Standards) and must at all times have an advisor. In the event that an advisor resigns from that position, it is the student’s responsibility to obtain a replacement.

Department codes shall designate a system for periodic evaluation of progress toward completion of the degree. The student and the advisor share responsibility for scheduling evaluations. Results of such evaluations will be sent to the department head and to the graduate student being evaluated.

Students judged to be making unsatisfactory progress toward a degree or whose work is not of the quality expected by the student’s advisor and/or graduate committee may be recommended for academic probation or immediate dismissal from the graduate program (see Scholastic Standards) and/or termination of assistantship. The Dean of the Graduate School will be informed in writing of all students who are making unsatisfactory progress. Copies of the letter shall be sent to the graduate student and also shall be maintained in a departmental file.

Prior to taking actions on academic probation for reasons of unsatisfactory progress toward a degree other than insufficient grade point average, termination of an assistantship for reasons of unsatisfactory performance, or dismissal from the graduate program, an informal conference shall be held among the student, the advisor, and the department head for the purpose of discussing the student’s performance and giving the student an opportunity to respond. The student will be provided reasonable notice of the issues to be covered in advance of the conference. In cases where grounds may exist for termination of an assistantship prior to the end of the stated employment period and for reasons of unsatisfactory performance, the supervisor(s) shall participate in the informal conference.

Graduate students have the right to appeal certain academic decisions, before any action is taken, as described under Graduate School Appeals Procedure. Appeals of grades and academic integrity decisions must utilize appropriate procedures described in the General Catalog. Students alleging termination of assistantships or dismissal from the graduate program on grounds of unlawful discrimination are advised to consult with the Office of Equal Opportunity. (For information on the “at will” employment status of graduate assistants, see Assistantships.)

**Graduate School Appeals Procedure**

Graduate students may appeal decisions concerning unsatisfactory performance on graduate preliminary or final examinations (see this section), academic probation for reasons of unsatisfactory progress toward the degree other than insufficient grade point average, termination of or election to void an assistantship for reasons set forth in the terms and conditions applicable to graduate assistant appointments, or dismissal from the graduate program for academic reasons to the Dean of the Graduate School. Grading decisions in courses are subject to appeal according to the University’s policy on Appeals of Grading Decisions, as set forth in the Academic Faculty and Administrative Professional Staff Manual (http://facultycouncil.colostate.edu/faculty-manual).

A student has a total of 35 working days to make a formal appeal to the Dean of the Graduate School from the date when an appealable decision has been made that is of concern to the student. Prior to submitting an appeal to the Dean of the Graduate School, the student should discuss the decision with the academic officer(s) whose actions are challenged in an informal attempt to resolve concerns. (Academic officers may include the student’s advisor, graduate committee, department head, supervisor, etc.) If the matter is not resolved to the student’s satisfaction, the student may initiate a formal appeal by submitting the matter in writing to the Dean of the Graduate School. In the written appeal:

1. the student must clearly identify the actions being challenged,
2. the rationale for the challenge
3. the person(s) against whom the complaint is made, and
4. the redress sought.

If an appeal is not filed within 35 working days following the adverse recommendation or decision, then this recommendation or decision will become final. If an appeal is filed within 35 working days, then the decision regarding the appeal is final. The original adverse recommendation or decision being appealed by the student remains in effect until the appeal is final.

The Dean of the Graduate School shall implement the appeal procedures below, keeping records of the case. A review panel, composed of two faculty members with degrees at the level being pursued by the student appellant or higher and one graduate student pursuing a degree at that level or above, will be appointed. One faculty member will be appointed by the Dean of the Graduate School and another faculty member will be appointed by the dean of the college in which the student appellant’s program is located. These appointees will be from departments other
than that of the student appellant, but they should be from related disciplines so they are reasonably familiar with the standard procedures in that department. In the event that either the Dean of the Graduate School or the dean is a principal in the case, the Provost will appoint appropriate faculty members. The Graduate Student Council will provide a list of graduate students pursuing graduate degrees who are willing to serve on review panels from which the Dean of the Graduate School will appoint a student who is from a different department than the student appellant, but who should be from a related discipline. In the event that the Dean of the Graduate School is a principal in the case, the Provost will appoint the student member.

The Review Panel will consider the case in detail. It must review any written record of the case. It must afford the student appellant an opportunity to appear in person before it and consider any relevant written materials the student may wish to bring to its attention. The panel will hear from the academic officer(s) whose action is being appealed and may confer with other involved parties. It shall evaluate any other information it deems important to its deliberations. Written summaries of the deliberations will be kept. To overcome the presumption of good faith in the performance judgment by the advisor, supervisor, and/or graduate committee, an appeal must demonstrate that the evaluation was based upon matters that are inappropriate or irrelevant to academic performance and applicable professional standards and that consideration of those matters was the deciding factor in the evaluation. If the panel finds in favor of the student by a majority vote, it will make appropriate recommendations to the Dean of the Graduate School, such as reassignment to another advisor and/or graduate committee, administration of another examination, or alternative assistantship assignment. The Dean of the Graduate School and the dean of the college involved shall jointly review the case, giving due consideration to the panel’s report and recommendations. Following consultation with the Provost, as appropriate, the Dean of the Graduate School shall make the final decision of CSU. In the event where the Dean of the Graduate School is a principal in the case, the duties of the Dean of the Graduate School, with respect to this case, shall be transferred to the Provost. In the event that the decision recommends termination of an assistantship due to unavailability of funds or other conditions beyond CSU’s control or due to a lack of performance of assigned duties and functions as set forth in the terms and conditions applicable to graduate assistant appointments, the termination must be approved by the Board of Governors, or the President, as its delegated representative.

Other appeal or reporting processes available to students are included below.

1. Students may appeal disciplinary issues, subject to the University Discipline Process, through the Student Resolution Center. (https://resolutioncenter.colostate.edu)
2. Students may file a complaint regarding what a person may believe to be an act of discrimination or harassment, based on race/ethnicity, eg, color, religion, national origin, or ancestry, sex gender, disability, veteran status, genetic information, sexual orientation, or gender identity or expression to the Office of Equal Opportunity (http://oeo.colostate.edu).
3. Procedures to report observed, suspected, or apparent Research Misconduct can be accessed through Research Integrity and Compliance Review Office (https://vpr.colostate.edu/ricro).

However, the number of 500 level or above credits earned for the degree must be 16 or 50% for a plan A or B, whichever is most and 21 or 50% for a plan C, whichever is most.
3. Plan B degrees require a minimum of 30 credits and either a scholarly paper, exam, portfolio, or similar project.
4. Demonstrated equivalency may reduce the total required to less than 58 but not less than 40.

**Master’s Degrees**

An important distinction is made between Plan A and Plan B, Plan C, and the Professional Science Master’s. The former, Plan A option, requires the preparation of a thesis. The thesis is typically a written formal document which addresses, in an original fashion, some important concern of the discipline. A thesis involves significant independent work. A certain number of credits are allowed for the preparation of the thesis. The Plan B degree does not require a thesis; instead, either a scholarly paper, exam, portfolio, or similar project is required.

Plan C master’s degree options are distinguished in two ways. First generally, only course work is required. No thesis, project, or final examination is required; however, some specific programs may require an internship, practicum, or other experience consistent with expressed goals of the program, as approved by the University Curriculum Committee. Second, Plan C options are designed for professional degrees; thus, this option is not available in the M.A. or M.S. Further, within any given department, Plan C degrees may not bear the same title as those with Plan A or Plan B options. Please note, however, that not every professional degree need offer the Plan C option.

The minimum number of required credits for all master’s degrees is 30.

The Professional Science Master’s (PSM) degree option (30 credit minimum) is designed to meet the following curriculum requirements: 1) a majority of credits must be earned in advanced science, technology, engineering, math and/or computational sciences courses over the two year program; 2) there must be a professional skills component; and 3) a capstone project based on an experiential component, that includes a field placement course (e.g. internship, practicum, affiliation, field work) must be a part of the curriculum. The PSM is to provide managers for organizations that provide technology-based outcomes in public, private, government, or non-profit sectors. PSMs must conform to the nationally accepted academic criteria for the PSM curriculum as determined by the PSM National Office (psmoffice@sciencemasters.com).
An active advisory board composed of individuals from industry, business, government, non-profit organizations, and CSU faculty is required; advisory board members serve to provide advice on the program curriculum, assist with student projects and placement, and interact individually with students. To be recognized as a PSM degree, programs must first be approved by the PSM National Office, and subsequently approved and routed through the paths required by the CSU Faculty Council, Curricular Policies and Procedures Handbook. PSM specializations are listed in the Graduate and Professional Bulletin.

Credit Requirements

Credit requirements vary greatly; for certain terminal professional degrees, the minimum number of credits may exceed 60; other master’s degrees vary from 30 to 36 (Table 1). Further, individual departments may have credit requirements in excess of these minimum university requirements. However, the number of 500 level or above credits earned for the degree must be 16 or 50% for a Plan A or B, whichever is most and 21 or 50% for a Plan C or Professional Science Master’s, whichever is most. A minimum of 24 credits must be earned at Colorado State, 21 of which must be earned after admission to the Graduate School. A minimum number of credits earned at Colorado State must be in 500 or higher level courses (21 for Plan C master’s degrees and Professional Science Master’s; 16 for all other master’s degrees). Of this number, at least 12 credits must be in regular courses. Plan C master’s and Professional Science Master’s programs may not include independent study, research, or supervised college teaching credits toward the degree unless one or more of these are required by the program, as approved by the University Curriculum Committee. Additionally, Plan C master’s may not include internship or practicum credits toward the degree unless one or both are required by the program, as approved by the University Curriculum Committee. Credits earned in pursuit of one master’s degree may not be used for a second except in those cases where an M.A. degree is applied to the M.F.A. (see section on Master of Fine Arts Degree).

Final Examination

At the discretion of the committee, the final examination may be oral or written, or both. At least one week before the final examination the adviser must inform the student and the committee member of the nature and scope of the examination.

Master of Fine Arts Degree

This is a terminal degree for practicing professionals in the visual or literary arts. In general, it requires at least three years of full time study beyond the baccalaureate or at least one year of full time study beyond the Master of Arts degree.

This degree requires the preparation of a major artistic work. This work, whether in the form of a product of the visual arts, a performance, or a written manuscript, must

1. demonstrate a level of creativity sufficient to establish the student as a member of the appropriate artistic community, and
2. stand in its own right as a significant aesthetic or literary contribution. This work is presented as an M.F.A. thesis.

Credit Requirements

Total credit requirements vary from 48 to 60 according to the department in which the degree is earned. Further, individual departments may have requirements in excess of CSU minimums laid out in this section.

In general, a minimum of 32 credits must be earned at CSU, 21 of which must be earned after formal admission to the Graduate School.

However, if a previously completed Master of Arts degree is submitted in partial fulfillment of the requirements, up to 30 credits may be accepted toward the program. If this option is used, no additional transfer credits may be accepted. In this case, a minimum of 18 credits must be earned after formal admission to the M.F.A. program.

At least 16 of the credits earned at CSU must be in 500 or higher level courses. Of the 16, 12 must be in regular courses. Other courses may be at the 300 or 400 level or may be in courses not defined as regular. However, the number of 500 level or above credits earned for the degree must be 16 or 50% for a Plan A or B, whichever is most and 21 or 50% for a Plan C, whichever is most.

Final Examination

The final examination may be oral or written or both. At least one week before the final examination, the adviser must inform the student and the committee members of the nature and scope of the examination.

Doctoral Degree

The doctoral degree is the highest academic degree offered by CSU. Those who earn it must demonstrate significant intellectual achievement, scholarly ability, and breadth of knowledge. The nature of the degree program will vary greatly depending on the type of doctoral degree and discipline involved. There are two types of doctoral degrees that may be earned, the doctor of philosophy (Ph.D.) and the professional doctorate (P.D.). There are several important distinctions between the Ph.D. and the P.D. The defining characteristics of each are as follows:

1. The Ph.D. and the P.D. degrees are distinguishable from each other based on the courses comprising the programs curricula, student learning outcomes, and measures of student success. The New Degree Program Proposal must address these components as part of the Provost’s and the University Curriculum Committee’s review process for such proposals.

2. For the Ph.D., the scholarly, scientific, and creative outcomes are expected to contribute to the knowledge base of the field. Extensive original research or creative activity relevant to the discipline is required. The preparation of a dissertation that presents the results of sustained research or investigation of an important intellectual problem is mandatory.

3. For the P.D., the experiential, scientific, and creative outcomes are expected to contribute to the highest level of professional skills and the application of such skills and knowledge in the profession and its practice. Applied or clinical research or extensive advanced experience relevant to the profession is required. The preparation of a dissertation that presents the results of an applied project relevant to the profession is mandatory for non-accredited programs; programs accredited through a national organization may require other capstone experiences or a dissertation.
Credit Requirements (Ph.D., P.D.)

A minimum of 72 semester credits beyond the baccalaureate is required for both the Ph.D and the P.D.

For students who submit a master's degree in partial fulfillment of these requirements: A master's degree from an accredited college or university may be accepted for a maximum of 30 credits. In addition, up to ten credits in courses earned after the date on which the master's degree was awarded may be accepted in transfer if approved by the student’s advisory committee, the department, and the Graduate School (http://www.graduateschool.colostate.edu). A minimum of 32 credits must be earned at CSU after admission to a doctoral program. At least 21 credits beyond the master's degree must be earned in courses numbered 500 or above.

For students enrolled in a continuous master’s/doctoral program at CSU: All courses taken during the master’s program may be applied to the doctoral degree, even if the total master’s degree credits exceed 30. These courses must be specified on the doctoral program of study and approved by the student’s advisory committee, the doctoral department, and the Graduate School. Continuous programs are those in which the student is admitted to the doctoral program and formally registers the Fall or Spring semester immediately following receipt of the master’s degree. All other prescribed credit requirements of the master’s and doctoral degrees remain in effect in such cases.

For students who do not submit a master's degree in partial fulfillment of these requirements: Up to ten credits earned at an accredited college or university may be accepted for transfer if approved by the student’s advisory committee, the department, and the Graduate School. A minimum of 62 credits must be earned at CSU after admission to a doctoral program. At least 21 credits beyond the bachelor’s degree must be earned in courses numbered 500 or above.

A professional post baccalaureate degree in Medicine, Veterinary Medicine, Dentistry, Pharmacy, Law, or Divinity may be accepted for a maximum of 30 credits. The institution granting such a degree must be certified by one of the major regional accrediting agencies. Students contemplating this option may be required to pass an equivalency examination to assure that they possess levels of knowledge and skill generally expected of master's degree holders.

P.D. Requirements

Requirements for a P.D. may vary based on the presence or absence of an accreditation process. P.D. programs that are accredited through a national organization will identify curricular content, process, and outcome requirements for the degree to meet the accreditation standards. These curricular requirements may take precedence over Graduate School requirements; however, the minimum number of credits and their level are Graduate School requirements regardless of accreditation standards. P.D. programs that are not accredited must conform to Graduate School requirements.

Departments or Special Academic Units with a P.D. program must form an active advisory board composed of CSU faculty and individuals from outside of CSU who are leaders in the discipline from applied settings. Advisory board members serve to provide advice on the program curriculum, assist with student projects and placements, and interact individually with students.

The Graduate School requires the following P.D. program components:

1. Programs that do not require relevant work experience for admission must include a significant experiential component within the curriculum.
2. Curricula must include a minimum of 18 credits of course work at the 500 level or above that reflect professionalism and applied or translational knowledge and fulfill the learning objectives of the programs. The 18 credits of coursework must meet the following criteria:
   a. A minimum of 6 credits is included within each of the two categories (professionalism, applied or translational knowledge).
   b. At least 9 credits must be regular coursework, and
   c. Up to 9 credits may be non-regular coursework. (Scholastic Standards (http://catalog.colostate.edu/general-catalog/graduate-bulletin/graduate-study/procedures-requirements-all-degrees/#scholastic-standards)).
3. The preparation of a dissertation is required for non-accredited programs. The dissertation is a formal written document which presents the results of an applied or clinical research project on an issue relevant to the profession and practice. The dissertation must represent an independent intellectual achievement and must make a meaningful contribution to the creation, use, and improvement of knowledge in the context of a profession and practice. Students typically earn a number of research credits while completing the work which underlies the dissertation.
4. At least one graduate committee member must have or have had a substantial and relevant employment record in an applied setting and meet the Graduate School requirements for membership (G (http://graduateschool.colostate.edu/policies-and-procedures/advisor-committee) Graduate Advisor and Committee Makeup (http://graduateschool.colostate.edu/policies-and-procedures/ advisor-committee)). The committee chair must submit to the dean of the Graduate School a request for approval of the individual that includes proof of the Advisory Committee's endorsement of the individual and a description of the individual’s substantial and relevant employment record in an applied setting.

Ph.D. Requirements

The preparation of a dissertation is required. The dissertation is a formal written document which presents the results of sustained research or investigation on an important intellectual problem. The dissertation must represent independent intellectual achievement and must make a meaningful contribution to the knowledge, accumulated wisdom, or culture of the field in which it is written. Students typically earn a number of research credits while completing the work which underlies the dissertation.

When programs within the same department that have both a Ph.D. and a non-accredited P.D., Ph.D. students in the department offering the P.D. may enroll in one or more of the 18 P.D. credits that meet the professionalism and applied/translational knowledge requirement. However, these credits may NOT count toward the 72 credits beyond the baccalaureate required for the Ph.D.; they will be in addition to that number. Credits earned in P.D. specific courses cannot be part of the program of study for any Ph.D. student.
Doctoral Residency Requirement (Ph.D., P.D.)

There is no CSU residency requirement for doctoral degree programs; however, such requirements may exist at the department level. Students should check with their departments about such policies. Whether or not a residency requirement exists, registration policies as outlined above must be followed.

Doctoral Preliminary Examination (Ph.D., P.D.)

A preliminary examination shall be administered at least two terms before the final examination to determine whether the student is qualified to continue toward the doctorate. The usual procedure is to have written examinations in the field of specialization and supporting areas followed by an oral examination. In order to assure full information to all concerned (student, major professor, all committee members, department head, Graduate School), the intention to hold a doctoral Preliminary Examination is to be publicized two weeks in advance by the advisor. The student is responsible for obtaining the Report of Preliminary Examination (GS Form 16) from the Graduate School and returning it, appropriately completed, after the conclusion of the examination.

Providing the committee approves, a candidate who fails the preliminary examination may be reexamined once and, for the reexamination, may be required to complete further work. The reexamination must be held not later than 12 months after the first examination. The examination must not be held earlier than two months after the first examination unless the student agrees to a shorter time period. Failure to pass the second exam results in dismissal from the Graduate School.

Participation in oral examinations by the student and/or one or more members of the examining committee may be via electronic link so long as all are participating simultaneously and all committee members and the student have agreed to this in advance.

Doctoral Candidacy (Ph.D., P.D.)

Doctoral students at CSU are considered to achieve “candidacy” for the degree upon passage of preliminary examinations. Candidates generally retain that status through the completion of the degree. However, candidacy is lost if

1. the student is placed on probation due to insufficient grade point average;
2. the student’s graduate advisory committee finds that insufficient progress is being made toward the degree; or
3. the student is dismissed for academic or disciplinary reasons.

The students who lose candidacy may regain it, when appropriate, through the established procedures for improving grade point average, demonstrating satisfactory progress, or achieving readmission.

Doctoral Final Examination (Ph.D., P.D.)

At least one month before the final examination, the advisor will inform the student and the committee members of the nature and scope of the examination. Normally, the final examination will cover primarily the dissertation, but additional subject matter, specified by the committee at the time of the preliminary examination, may also be covered. Dissertation defenses are open to all members of the CSU community and the public at large. In order to assure timely notification across the entire campus, advisors should announce this information to the CSU community and public at least two weeks in advance. Advisors may publicize the defense through CSU’s electronic announcement and message delivery system. The chairperson of the committee shall have the prerogative to decide whether those in attendance (outside of the committee) should be allowed to ask questions of the candidate during an oral examination.

Graduate Specializations

Within graduate degree programs, certain well-defined “specializations” may be offered. A Graduate Specialization is a formal Faculty Council approved program with a defined curriculum addressing a specialty within one of the graduate degree programs. Specializations are automatically listed on transcripts. Please visit the Graduate School website (http://graduateschool.colostate.edu/?s=specializations) for a listing of degrees and available specializations.

Graduate Certificates

Graduate Certificate Program

Graduate Certificates are optional and are offered by certain departments, Special Academic Units (SAUs), or colleges. A Graduate Certificate consists of a minimum of 9 specified credits, and not more than 15 credits. All of the credits must be coursework at the graduate level (500- to 700-level). A student must earn a cumulative GPA of 3.000 or better and a minimum of a “C” in the courses required in the Graduate Certificate. All coursework must be traditionally graded.

A Graduate Certificate may include courses from one or more academic units or special academic units. For certificates involving courses from two or more units, the coordinating department is indicated in the List of Graduate Certificates.

Guest and degree-seeking students with bachelor’s degrees are eligible to apply to participate in the Graduate Certificate Program. Students must apply for admission into the program and for the conferral of the certificate. Students must be enrolled at CSU in order to receive and complete the certificate requirements. Graduate certificates by title are noted on the student’s academic record (transcript) at the time of degree conferral. The certificate title is not on the diploma. See the Graduate School website (http://www.graduateschool.colostate.edu/prospective-students-degrees.aspx) for details.

Graduate Thesis and Dissertation

Although a thesis or dissertation is planned and executed with the advice and supervision of the advisor and committee, the student must assume primary responsibility both in terms of the content of the document and in terms of its format and presentation.

Graduate students may be responsible for all or part of the expense of their thesis/dissertation research. This expense is highly variable depending on the discipline, the research topic, and the availability of support from funded projects, sponsored programs, or academic departments.

Theses and dissertations submitted for graduate degrees must be completed in the English language. In circumstances in which
scholarship would be enhanced if these documents are completed in a foreign language, this must be approved by the student’s committee and the Chair/Head of the program. In such cases, an English translation of the title and abstract must be included in the document.

The candidate must submit to the Graduate School the Thesis/Dissertation Submission Form and submit his or her thesis/dissertation electronically by the published deadline date listed on the Graduate School website. Students should consult these deadlines whenever they approach important steps in their careers. Suggestions for preparation of the manuscript may be found in the Thesis and Dissertation Formatting Guide (http://graduateschool.colostate.edu/for-current-students/completing-your-degree/thesis-dissertation).

Students have the right to disseminate the findings of their theses and dissertations more broadly than is accomplished by archiving and microfilming. Prompt publication of important results is clearly in the best interests of the academic community and society as a whole. Students are therefore encouraged to bring such results to the manuscript submission stage within one year of the award of the degree.

Master’s theses and doctoral dissertations are electronically archived by the Libraries and ProQuest/UMI. General information on copyrights, publication, and embargos may be found in the Thesis and Dissertation Formatting Guide (http://graduateschool.colostate.edu/for-current-students/completing-your-degree/thesis-dissertation). As a public institution, CSU exposes bibliographic information about theses and dissertations on the Internet for purposes of discovery and retrieval. One of the functions of CSU is the generation and dissemination of contributions of knowledge and culture. The fundamental purpose of theses and dissertations is to make such contributions openly available for public benefit.

Graduation Procedures

Application for Graduation

A graduate student must apply for graduation by submitting to the Graduate School Office an Application for Graduation (GS Form 25). (Deadlines are available on the Graduate School website [http://graduateschool.colostate.edu/policies-and-procedures/deadlines-dates] for students in combined bachelor’s/master’s degree programs, and on the Graduate School website [http://graduateschool.colostate.edu/policies-and-procedures/deadlines-dates] for students in Integrated Degree Program [IDP] Admissions.) An application for graduation from the Graduate School must be either contemporaneous or subsequent to filing an application for receiving the bachelor’s degree. Students must be registered during the semester they complete their degree requirements as specified under Graduate Enrollment Requirement above.

Clearance for Graduation

Departmental requirements (i.e., language requirement, preparation of required papers for publication, return of keys and equipment, cleaning up office and laboratory areas) and discrepancies in grades for graduation term must be completed by the end of the term.

Failure to meet all requirements during the term requested on GS Form 25 will necessitate reaplication for graduation online. Diplomas will be mailed approximately six to eight weeks after the end of the graduation term to the mailing address on file with CSU.

Inter-University Graduate Programs

Colorado Exchange Program

Collaborative Degree Program

Colorado State University, in cooperation with the Colorado School of Mines, the University of Northern Colorado, and the University of Colorado, provides tuition-free instruction for graduate students through a reciprocal agreement. The following conditions must be met to qualify for the program:

1. The graduate student is registered and paying full tuition and fees at the home institution.
2. The course requested is part of a regular load – not an overload.
3. The student is pursuing a program leading to an advanced degree.
4. All courses requested must be required for the degree program or a prerequisite for one of the required courses.
5. The course is not offered on the student’s own campus when that student can take advantage of it.
6. The request is presented prior to the registration for the semester the term course is to be taken.
7. A separate request form is completed for each course taken.
8. Space is available.

Tuition and fees for such registrations will be assessed as though the courses were taken on the CSU campus. Credits so earned may count toward fulfillment of degree requirements within the limits set by the student’s department, graduate committee, and the Graduate School. Credits earned at Colorado institutions in cooperative programs approved by the Graduate School at CSU may not exceed 49 percent of the total credits presented for an advanced degree. Credits used to fulfill degree requirements at one of the other institutions may not be used to fulfill requirements at CSU.

Additional information and registration forms are available in the Registrar’s Office (http://registrar.colostate.edu).

Collaborative Degree Program

A collaborative degree is one that partners a CSU graduate program with a similar graduate program at an international university in order to allow students to transfer credits between the two programs and earn a degree at CSU. Both CSU and international students must earn a minimum of 60% of the degree credits at CSU and the remaining credits at the international university in either a master’s or PhD degree.

The coursework for the degree program offered at the collaborating university must meet CSU standards. The courses accepted for transfer from the collaborating university to the CSU program must be equivalent in credit and content. These courses must be listed, evaluated and approved by the CSU department offering the degree; these courses must provide similar content and student learning outcomes and be reflected in the course syllabi as such. The coursework/syllabi that will be transferred from the collaborating university must be translated into English by the collaborating university for evaluation purposes.

International universities, colleges, or degree granting institutions must be invited to participate in a Collaborative Degree Program by a CSU program department. Such institutions must be accredited by a major regional accrediting agency in order to be eligible to participate in a Collaborative Degree Program. An agreement must be signed between CSU and the collaborating university that specifies the conditions of
the agreement such as admission and pathway requirements, number of students eligible to participate, insurance, travel, enrollment, and other administrative issues. Collaborative degree students must meet all Graduate School admission and degree requirements. (See the Graduate School website [http://graduateschool.colostate.edu](http://graduateschool.colostate.edu) for more details.) The agreement must be reviewed and approved by the following individuals from CSU: Dean, Department Head, and Program Director of the program wishing to create a Collaborative Degree Program; Legal Counsel; International Programs; Provost; Graduate School; individuals from the international university that have the authority to sign in support of the Collaborative Degree Program on behalf of the collaborating university. When a student is completing a master's thesis or doctoral dissertation an additional agreement/Cotutelle must also be completed and signed by the relevant parties that specifies the co-direction of the work and other pedagogical and publication-related issues. When students meet the requirements for the Collaborative Degree Program, CSU independently confers the degree. The collaborating university may also independently confer a degree. A review process to monitor the quality and outcomes of the Collaborative Degree Program will be established by the department. Data will be reported to the College Dean and Graduate School or as stipulated in the review process.

**Graduate Assistantships**

**Assistantships**

Graduate Assistantship-Terms and Conditions of Appointment

Termination of Graduate Assistants

**Assistantships**

Assistantships offer a stipend to the student in return for certain specified services to CSU. The stipend is treated as income (subject to withholding taxes) and both CSU and the student agree to a formal appointment when an assistantship is arranged. Both the amount of the stipend and the extent of time commitment vary from case to case and are set forth in the appointment.

Performance of the assistantship duties provides the student with valuable experience which contributes to professional and career development. Most graduate student support at CSU and many other American universities is in the form of assistantships.

Teaching assistantships involve payment for services related to undergraduate instruction. Some form of experience, skill, or aptitude is necessary for appointment. The duties typically involve grading papers, compiling biographies, monitoring laboratories, conducting discussion sections, or teaching an entire class. Some of these duties require that teaching assistants be able to communicate effectively in English. Usually, teaching assistant duties are confined to beginning-level undergraduate classes.

Departments will conduct the ASCSU course survey for each teaching assistant who is the instructor of record for a course. For teaching assistants who are not the instructor of record but with significant undergraduate teaching contact, departments will ensure that an appropriate survey is completed. These surveys and records of other student feedback will be maintained as part of the department’s information base and made available to faculty and administration for future assessment of the policy’s effectiveness.

Teaching assistants required to take the TOEFL, IELTS, or the PTE Academic for admission will also be evaluated for their ability to communicate orally in English by their departments. The evaluation will occur prior to pedagogical exposure in the undergraduate classroom using a mechanism that is commensurate with the teaching expectations for their positions. A committee, appointed by the department, shall offer evaluative feedback to potential teaching assistants and determine whether they are capable of teaching in the program. This evaluation shall become part of the student’s file. Departments will use the results of both the oral evaluation and course surveys, when available, in determining whether a teaching assistant communicates effectively in English. Teaching assistants unable to communicate effectively in English will be given assistance to help them become more proficient before being reevaluated and assigned responsibilities for classroom instruction.

Teaching assistantships are funded by the state of Colorado as part of the resident instruction budget. Teaching assistantships include payment of tuition on behalf of the student as an added benefit.

Research assistantships are basically similar to teaching assistantships except that recipients are given basic research assignments. The precise nature of the duties will vary depending on the nature of the discipline, the particular projects under way in the department, and the interests and skills of the students. Often the work required is related to the student’s course work; in some instances it may directly contribute to thesis, dissertation, or other degree requirements. Generally, research assistantship work is an important part of the process of becoming an active participant in the discipline.

Research assistantships are typically funded through external research grants obtained by members of the faculty. A research assistantship contract may provide for payment of tuition, but this is not necessarily the case.

Residence hall, counseling, and athletic assistantships may be available. Residence hall assistantships sometimes include room, board, and tuition in addition to stipends. Write the Office of Housing and Dining Services ([http://housing.colostate.edu/contact-us](http://housing.colostate.edu/contact-us)) for residence hall assistantships; University Counseling Center ([http://health.colostate.edu/services/counseling-services](http://health.colostate.edu/services/counseling-services)) for counseling assistantships; and the Athletic Director ([http://www.csurams.com/directory/csu-directory.html](http://www.csurams.com/directory/csu-directory.html)) for athletic assistantships.

**Graduate Assistantship - Terms and Conditions of Appointment**

The following terms and conditions apply to all graduate students being appointed as Graduate Assistants. The Graduate Assistant Appointment and Certification Form generated by the academic department should be signed only after reading the terms and conditions set forth below and those noted on the Graduate Assistant Appointment and Certification Form.

All appointments of a student (the “Student”) as a Graduate Assistant (the “Appointment”) by Colorado State University (the “University”) are effective on the date set forth beside the student’s signature on the Graduate Assistant Appointment and Certification Form, subject to final approval (“Final Approval”) by the Board of Governors of the Colorado State University System or the individual to whom the Board has delegated such authority (its “delegated representative”).

The stipend payable to a Graduate Assistant, as specified on a Graduate Assistant Appointment and Certification Form, is offered in return for services and shall be deemed taxable compensation. Tuition remission, if specified on a Graduate Assistant Appointment and Certification Form, is provided in the form of financial aid, independently of the stipend, as a
qualified tuition reduction given for educational purposes under Section 117 of the Internal Revenue Code.

A Graduate Assistant may be appointed as a Support Assistant, a Teaching Assistant, or a Research Assistant, or some combination thereof, as specified on a Graduate Assistant Appointment and Certification Form. Support Assistants provide administrative services; they are typically located in non-academic units like Housing or Athletics, but may be found in any office. Teaching Assistants help in the provision of educational services to undergraduates. Responsibilities may range from grading papers through leading discussions or lab sessions to complete independent teaching of a class. Research Assistants typically work with a professor on a project of importance to scholarship. The particular nature of Student’s duties will be specified in writing, to the Student by the student’s advisor or a departmental representative.

Full-time graduate students should not be appointed to more than a half-time assistantship or hold a sum of part-time assistantships greater than half-time. A half-time assistantship (.5 FTE) usually involves an average of about 20 hours of service per week of a nominal 40 hour workweek. Stipends will vary by department and by the duties assigned as well as the skills, competencies, and experience exhibited by the student. However, the stipend for half-time assistants must be paid no less than the Graduate School’s officially established minimum monthly amount. Contact the Graduate School for information on the amount of this minimum for any given year. A quarter-time assistantship (.25 FTE) usually involves an average of about 10 hours of service per week of a nominal 40 hour workweek. Those with such assignments, must be paid a minimum of half of this amount. Any other level of appointment (e.g. less than 25% or between 26% and 49%) must be paid at least the prorated established minimum stipend. The level of appointment, amount of stipend and any tuition remission for each Graduate Assistant shall be as set forth on the Graduate Assistant Appointment and Certification Form.

Signature of the Graduate Assistant Appointment and Certification Form by the Student and Final Approval by the Board of Governors of the Colorado State University System or its delegated representative shall constitute a legally binding employment agreement (the “Agreement”) between the University and Student. Such Agreement shall be subject to the following terms and conditions:

1. Appointment as a Graduate Assistant is expressly conditioned upon:
   a. Student securing admission to a graduate degree program and the Graduate School, and registering for and completing at least one (1) on-campus credit during each fall and spring semester, and such credits as the appointing department may require each summer term during which the appointment is in effect.
   b. Student’s conformance to each of the following: maintaining good academic standing at Colorado State University; maintaining at least a 3.0 grade point average in each of the various categories (regular courses and overall) specified in the Scholastic Standards section of the Graduate and Professional Bulletin after having attained 12 credits of regular coursework or two semesters of graduate work, whichever comes first; not being placed on academic probation; and for non-native speakers of English, taking and obtaining a satisfactory score on prescribed language competency tests.
   c. Continued association with and enrollment in an academic department and the absence of suspension, dismissal, expulsion, or withdrawal from the University, Graduate School, or department.
   d. Student’s performance of assigned duties and functions in a timely and competent fashion.
   e. A routine background check, if applicable, is completed and reviewed in compliance with the Colorado State University policy regarding background checks.

Conditions A through D above shall be deemed conditions precedent which must be met by the Student in order to remain eligible for appointment as a Graduate Assistant. Failure to meet conditions A through D above shall render the appointment voidable at the option of the University, which option may be exercised by discontinuing payment of the stipend. Failure to meet the condition set forth in E above may result in termination of the Appointment, subject to Paragraph 5 below. Termination of or election to void the Appointment shall terminate the stipend payable thereunder, although such action shall not result in forfeiture of the tuition remission for the semester in which it occurs.

2. The University and the Student understand and agree that the stipend portion of an Assistantship is not a scholarship award; rather it is an appointment which involves the performance of services in return for reasonable compensation in the form of stipend. Tuition remission may also be provided in the form of financial aid, independently of the stipend, as a qualified tuition reduction given for educational purposes under Section 117 of the Internal Revenue Code.

3. The term of appointment as a Graduate Assistant and the stipend and tuition remission amounts specified in a Graduate Assistant appointment and Certification Form may reflect the anticipated continuation of the appointment for more than one academic semester, which is set forth as an administrative convenience only. Notwithstanding any such provisions, the term of appointment as a Graduate Assistant and Student’s right to receive the stipend and tuition remission during any succeeding academic semester is not guaranteed by the University and no offer of future appointment shall be implied.

4. The University (or the appointing department) reserves the right to terminate the Appointment because of unavailability of funds or other conditions beyond its control upon thirty days written notice to Student, said notice effective when posted in a U.S. Mail Depository with sufficient postage attached thereto. Termination of the appointment shall terminate the stipend payable thereunder, although termination shall not result in forfeiture of the tuition remission for the semester in which such termination occurs.

5. Pursuant to State Statute C.R.S. 24-19-104, all Graduate Assistants are “employees at will” and their employment may be terminated by either party at any time, for any reason or no reason. Termination of at-will employees does not generally require pre-termination due process. However, except for non-renewals of employment following the end of a stated employment period or election to void an appointment due to failure of conditions A through D under Paragraph 1 above, the Provost/Academic Vice President must review and approve any recommendations concerning the termination of a Graduate Assistant Appointment, including a determination, based on advice from the Office of the General Counsel, as to whether any pre-termination due process is appropriate under the circumstances. Approval of the Board of Governors of the Colorado State University System or its delegated representative is required prior to any final action on such terminations. The provisions of this section shall not be interpreted to authorize the termination of any Graduate Assistant for any reason that is contrary to applicable federal, state, or local law. Termination of or an election to void an Assistantship shall be subject to appeal.
Termination of an assistantship shall be subject to appeal in accordance with the Graduate Appeals Procedure.

Awards from Outside Agencies

There are two broad categories of financial support available to graduate students. The first is awarded on the basis of academic merit or the possession of competencies that permit the performance of specific services. The second is based on demonstrated student financial need.

Merit or Competency-Based Financial Support

Awards are generally arranged or initiated at the level of the academic department. Students should contact the department head on all matters relating to them.

Application for Financial Support

Deadlines

Most merit- or competency-based financial support is awarded on an academic year basis beginning in the Fall Semester. The primary deadline for receipt of complete applications for such support is February 15. Persons who wish to be considered should submit an application for admission. This will ensure consideration for all types of support that might be available. The first review and award cycle will begin immediately after February 15.

However, applications completed later than this date will be considered as availability of funds permits. Some departmentally-based awards, particularly in the form of research assistantships and teaching assistantships, may be awarded on a later schedule. Also, ad hoc funding opportunities may become available at various times throughout the year.

Applicants who intend to begin their studies in the Spring Semester or Summer term should submit application for admission (http://www.graduateschool.colostate.edu/prospective-students/apply) and application for financial support by the appropriate primary deadline date, July 15 or November 15 respectively. Again, this will ensure consideration for all types of support that might be available.

Applications completed later than these dates may be considered for any appropriate departmentally-based or ad hoc awards.

Some forms of financial support applications may require other specification as indicated below.

Termination of Graduate Assistants

Pursuant to State Statute, C.R.S. 24-19-104, all graduate assistants are "employees at will." Their employment is subject to such administrative termination procedures as may be appropriate under the circumstances of each case. Advisors and/or department heads must consult with the Dean of the Graduate School prior to taking any actions concerning terminations of assistantships before the end of the stated employment period. Except for non-renewals of employment following the end of stated employment periods or election to void an appointment as set forth in the terms and conditions applicable to graduate assistant appointments, the Provost/Academic Vice President must review and endorse any recommendation concerning the termination of graduate assistants. Approval of the President or Provost/Academic Vice President as the delegated representatives of the Board of Governors is required for any final action on such terminations. Stipends payable under graduate assistantships shall be terminated upon discontinuance of association with the appointing department, dismissal, placement on academic probation, or withdrawal from CSU. Such actions will not cause forfeiture of the tuition remission for the semester in which such action occurs. The provisions of this section shall not be interpreted to authorize the termination of any graduate assistant for any reason that is contrary to applicable federal, state, or local law.
Financial Aid

Application Requirements
1. Be admitted to the graduate school in a regular program of study.
2. Complete a Free Application for Federal Student Aid (https://fafsa.ed.gov) (FAFSA). This will require your Federal Student Aid (FSA) ID Username and Password. If you have not created an FSA ID, you will be prompted to do so on the FAFSA website.
   a. Applicants should prepare their most recent federal income tax return before completing the FAFSA. For priority consideration the FAFSA should be submitted to the federal processor by March 1.

Graduate fellowships and graduate teaching and research assistantships are offered through the departments.

Funding
All financial aid, other than Federal Direct Loans, is awarded to the neediest students until funds have been exhausted. Federal Direct Loans are awarded on an ongoing basis.

Website
Please visit the Office of Financial Aid (https://financialaid.colostate.edu) website for information on applying for financial aid, types of financial aid, costs, paying your bill, residency requirements, scholarship searches, how to contact us, etc.

Credit Requirements
Graduate students must be enrolled in at least five (5) credits to receive Federal Direct Loans. A financial aid award is based on full-time enrollment (9 credit hours); if a student is enrolled part-time, financial aid may be reduced and/or delayed. A student registered for Continuous Registration is not eligible to receive financial aid and is also not eligible for a loan deferment.

Satisfactory Academic Progress Standards
Students applying for and/or receiving financial aid are expected to maintain satisfactory academic progress. Failure to perform at established levels may result in students becoming ineligible for financial aid. Students’ total number of credits are also evaluated, and students may not exceed established credit limits. Additionally, if a student receives all “F”, “U”, and/or “W” grades, they will be required to verify the last date of attendance and may be required to return up to 50% of the financial aid received. Copies of the complete policy (http://sfs.colostate.edu) are available online and in the Financial Aid Guide.

Fellowships and Traineeships
All fellowship awards are based on merit and are highly competitive.

These forms of support involve outright awards to cover educational expenses and may in some cases cover tuition, fees, and other direct expenses. They do not require any service on the part of the student. Several programs funded by a variety of private and public sources may be available at any given time. Graduate fellowship awards are available. These awards are designed to be part of a full support package and hence are usually supplementary to an assistantship appointment. Departments nominate promising candidates for these awards in response to a call in the fall of each year. Fellowships are given in recognition of academic excellence, student contribution to any of the goals of the CSU strategic plan (e.g., undergraduate instruction, diversity), and departmental quality.

The Martin Luther King, Jr. Graduate Scholarship provides support each year for a graduate student at CSU. It is awarded on the basis of academic excellence and contributions to the enhancement of individuals from ethnically diverse populations.

Income taxes
Assistantship stipends are considered payment for services rendered and are thus subject to regular income taxation. Appropriate amounts are withheld from stipend checks as per Internal Revenue Service Requirements.

Tuition payments made on behalf of graduate assistants may be considered “qualified tuition reductions,” not subject to income taxation. However, this is explicitly dependent upon the proper execution of the formal contract described above.

Fellowship awards are considered taxable income. However, tuition and certain other direct educational expenditures may be excluded. Most fellowship holders will incur some tax liability. CSU will not deduct from fellowship checks to cover this liability; paying the taxes is a matter of individual responsibility. Fellowship holders should be aware of this additional liability in planning their financial affairs.
Veteran's Education Benefits

The Registrar’s Office assists the Department of Veterans’ Affairs (VA) in providing certification for the following education benefits:

Under Title 38, U.S. Code

- Chapter 30 (Montgomery G.I. Bill)
- Chapter 31 (Vocational Rehabilitation)
- Chapter 32 (Post-Viet Nam Era)
- Chapter 33 (Post-9/11 G.I. Bill)
- Chapter 35 (Dependents Educational Assistance)

Under Title 10, U.S. Code

- Chapter 1606 (Selected Reserve/National Guard Members)
- Chapter 1607 REAP (Reserve Education Assistance Program)

In addition, the Office of Military & Veteran Benefits will advise and assist students in:

- Meeting residency requirements under the Veterans Choice Act of 2014, Colorado’s GI Promise or the Yellow Ribbon Program
- Requesting and obtaining Joint Service Transcripts
- Obtaining additional campus services

Students eligible for any of these benefits must contact the Office of Military and Veteran Benefits (http://registrar.colostate.edu/military-veterans-benefits/benefits-contact-information) in the Registrar’s Office prior to the expected date of enrollment. Applicants should apply to CSU in a degree-seeking major or for teacher licensure before applying for veterans’ education benefits.

A description of the services (http://veteransresources.colostate.edu) CSU provides may be found online. Regulations governing receipt of veteran’s education benefits, Standards of Progress, and other policies (http://registrar.colostate.edu/military-veterans-benefits) are also available online.

Sponsored Students

Sponsored students are those whose tuition, fees, or expenses are paid by an employer government agency or other sponsoring agency. Many international students, as well as some from the U.S. fall under this category. In those cases where sponsors provide direct support for students’ research activities, special custodial accounts must be established. Additional fees are associated with this service. Specific information on these accounts is provided to each student at the time of admission and additional advice may be obtained from the Graduate School, or in the case of international students, from the Office of International Programs, to the attention of the International Sponsored Student Coordinator, International Student and Scholar Services (ISSS).

"In-State Residency" for Tuition Classification Purposes

Authority to set tuition rates is vested in the governing boards of Colorado’s state institutions of higher education. The tuition rates which apply to any succeeding fiscal year will not be known until June of each year. The Board of Governors of the CSU System, therefore, reserves the right to change tuition and fee schedules and related policies, including the time, date, and method for payment, at any time.

By registering for a course, a student acknowledges legal and financial responsibility for any and all tuition and fees assessed as a result of registration. Students must follow, and are financially responsible for, formal add/drop and withdrawal procedures at CSU. Non-attendance does not relieve a student of financial responsibility. A student whose account becomes delinquent will be held responsible for paying any late payment charges, collection agency fees up to 40% of the debt, and all costs and expenses including reasonable attorney fees that CSU incurs in its collection efforts. CSU will not register a student, release a diploma or proof of degree, nor provide official transcripts to any current or former student who has past due financial obligations to CSU.

Graduate Students (Except Professional Veterinary Medical Students)

Resident and Non Resident fees can be found on the Tuition & Fees (https://financialaid.colostate.edu/base-tuition) website.

Approved WICHE Programs

Out-of-state residents enrolled in WICHE’s WRGP Program in Animal Reproduction and Biotechnology (M.S., Ph.D.), Construction Management (M.S.), Education and Human Resource Studies (Ph.D.), Master of Agriculture in Integrated Resource Management, Political Science in Environmental Politics and Policy (Ph.D.), Radiation Protection (M.S., Ph.D.), Social Work, Rural and Changing Communities (M.S.W.), and Technical Communication (M.S.) pay Colorado resident tuition.

Graduate Charges for Technology/Term

Fees can be found on the Tuition & Fees (https://financialaid.colostate.edu/base-tuition) website.
Veterinary Medicine Students Enrolled in Professional Course Registering for 9-24 Credits

Senior veterinary students are assessed tuition on a credit basis for each semester since their class schedules vary during the three-semester period. Fees (https://financialaid.colostate.edu/base-tuition) for senior veterinary students are assessed over three semesters in equal payments. The University Technology Fee is also assessed to seniors for summer term.

Special Fees

In addition to the regular charges which all students are assessed, other fees may be applicable at certain times or for certain groups of students pursuing particular activities.

Paying Your Bill

<table>

<tbody>

Charges that are incurred after the bill date for the semester will be billed mid-month of the following month and have a due date of the 10th of the month after that statement date or the following business day if the 10th falls on a weekend or University holiday.

University charges are due by the date specified on your bill. Due dates are the 10th of each month unless the 10th falls on a weekend or holiday. In those cases, the due date is the following work day. Payment of all CSU charges is to be received in the University Cashier’s Office or cashiering system by the due date to avoid late payment penalties. Penalties include a late payment charge and holds on CSU services. Payments by check are processed when received – postmarks do not apply and future dates are not honored.

Students are responsible for all charges on their account and arrangement of payments due. Payments should only be made when a balance due exists on an account. Credit card overpayments will be credited back to the originating card. All other overpayments will be refunded via mailed check to the student.

In support of CSU’s Green Initiatives, CSU implemented e-billing effective in Fall 2010. Billing notifications are e-mailed to Rams e-mail addresses. Students can then log into RAMweb to view their University Billing Statement. Additional billing notifications may be sent to alternate e-mail addresses maintained by the student on RAMweb. Students who are sponsored by a third party may request direct billing to the sponsor for tuition, fees, and other related educational expenses. Detailed information
on sponsor billing is available upon request from the Office of Financial Aid. Arrangements for sponsor billing must be made prior to the student account due dates to prevent late payment penalties.

“Billing Information” in RAMweb (https://ramweb.colostate.edu) provides more information on setting up a billing address, billing statement information, accepted payment methods, credit balance refunds, and education tax credit information.

Late Payment Penalties

Late Payment Charges

Mailed payments must reach the University Cashier’s Office, 6015 Campus Delivery, by 4:00 p.m. mountain time on the due date (postmarks do not apply). Online payments must be made by 2:00 p.m. mountain time on the due date for the payment to be considered timely. Penalties in the amount of 1.5% of the past due balance will be assessed monthly for the purpose of encouraging prompt payment. Failure to pay amounts due may also result in referral of outstanding balances to a collection agency. These agencies may take legal action to collect past due balances. Further, CSU reserves the right to impose a penalty fee and financial hold for returned checks.

Registration, Transcript, and Diploma Holds

Unpaid past due balances may cause a hold on registration, transcripts, and diplomas. CSU will not register a student, release a diploma or proof of degree, nor provide an official transcript or diploma to any student or former student who has past due financial obligations to CSU until the hold is removed. The release of the hold may be expedited by paying the past due balance in full.

Returned Checks

Any person who presents a check to CSU, either paper or electronic, that is not accepted for payment by the bank (due to insufficient funds, stopped payment, non-existent account, or other reason for which the person is responsible) is charged a penalty as provided by state law. Contact the Treasury Services Office, 555 S. Howes Street First Floor, for the current returned check penalty fee.

CSU sends a notice to the person who presents a check that is not accepted for payment by the bank. In the case of students, the notice is mailed to the student’s billing address on file with CSU. Within the time specified in the notice, the person is expected to make payment by guaranteed funds including cash, cashier’s check, money order, wire transfer, or accepted credit cards. The payment must be equal to the total of the invalid check plus penalty fee if applicable. Failure to do so will result in action deemed appropriate under the circumstances. If the original presentation of the returned check allowed a student to register for an academic term and full payment of the check plus penalty fee is not made within the time specified in the notice, the student’s class schedule may be cancelled.

Conditions that Affect the Assessment of Charges

Tuition and fees for a student registering for a combination of regular on-campus courses, or Continuing Education (CSU Online) courses will be assessed individually according to the schedule established for each. Students who are off campus for full-time internships, practica, or professional affiliations, and who are not concurrently enrolled in other on-campus experiences or courses, may be assessed a reduced student fee. CSU usually pays the tuition on behalf of teaching assistants (full-time registrants who receive a stipend of at least $1,370.00 per month). Research assistantship stipends are typically paid from research grants received by faculty members. Tuition charges may also be paid from these grant funds on behalf of the students, but practice is highly variable. Information should be requested from the department head or the faculty member serving as principal investigator on a particular grant. All students are directly responsible for the payment of fees.

Integrated Degree Program (IDP) Admission students enrolled in combined bachelor’s/master’s degree programs will be assessed tuition at the undergraduate rate until they have accumulated 120 credits towards their baccalaureate degree after which they will be assessed tuition at the graduate rate. Such students likewise become eligible to hold Graduate Assistantships at the same transitional time.

Additional Academic Expenditures

Graduate students may be responsible for all or part of the costs involved in the preparation of theses, dissertations, or other pieces of scholarly work required in the academic program. The expenses of an appropriate research or artistic project are highly variable, depending on the discipline, the specific nature of the work involved, and the availability of resources from funded projects, students’ sponsoring agencies, or the academic departments. In some cases, students may pay such costs directly. In others, departments may request that funds be deposited in a special account in advance.

Personal Expenses

Health Insurance

The CSU Student Health Insurance Plan is designed to work in conjunction with the student fee-funded services provided at the CSU Health Network. The plan, underwritten by Aetna Life Insurance Company and its affiliates (“AETNA”), provides students with access to comprehensive, high quality care. Plan benefits are provided both within the CSU Health Network and when services are provided off campus, outside the CSU Health Network. Fee-paying students are eligible to enroll in this plan.

Graduate students who are enrolled in less than six (6) RI credits may opt into coverage by completing an enrollment form at the CSU Student Insurance Office (information in the Student Insurance Office before the plan enrollment/cancellation deadline. Graduate students enrolled in LESS THAN six (6) resident instruction (RI) credits will NO LONGER be automatically enrolled.

Students enrolled in six or more resident instruction credit hours are automatically enrolled in the plan and are subject to the mandatory insurance requirement. These students must demonstrate proof of enrollment in comparable insurance in order to opt out via the CSU Student Health Insurance Waiver (http://www.health.colostate.edu) process. Students who have been granted a waiver in the fall semester will be automatically waived in the spring semester as well. All waiver requests must be submitted by the published enrollment/cancellation deadline.

If you do not waive out of the plan by the enrollment/cancellation deadline, your student account will be billed for the premium. Due to the terms of the insurance carrier, no exceptions can be made. Information about the enrollment/cancellation deadline (http://health.colostate.edu/student-health-insurance) for each semester is available online.

Note for International Students: International students are required to hold health insurance regardless of their enrollment status. You will be automatically enrolled in the CSU Student Health Insurance Plan and...
must show proof of enrollment in a comparable plan through the waiver process if you wish to opt out.

For more information visit the CSU Health Network (http://www.health.colostate.edu) or the Graduate School (http://graduateschool.colostate.edu/current-students/student-resources/health-insurance) websites.

**Living Expenses**

Since individual habits and needs vary greatly from individual to individual it is difficult to produce a standard estimate of overall living expenses. Information on housing options and costs is available through Housing and Dining Services (http://housing.colostate.edu) and the Office of Off-Campus Life (http://ocl.colostate.edu/home).

New students should be aware that expenses incurred as a graduate student are likely to be higher than as an undergraduate. The purchase of research supplies, the acquisition of a personal library, attendance of seminars, conferences and meetings, and general change of lifestyle are some of the factors that may account for this.

International students particularly may incur high costs. Many necessary articles cannot be transported as luggage and may have to be purchased after arrival at CSU. Clothing appropriate to the climate may have to be acquired. A detailed estimate of expenses including out-of-state tuition and fees, living expenses, and cost of mandatory health insurance for a full calendar year (two semesters and a summer term) may be obtained from the Office of International Programs (http://www.international.colostate.edu) or emailing isss@colostate.edu.

"In-State Residency" for Tuition Classification Purposes

Classification of students for tuition purposes is governed by State Statute ("tuition law") which sets forth conditions for a student being considered as "in-state" for purposes of tuition classification. The tuition law is contained in sections 23-7-101 to 111, of the Colorado Revised Statutes. Although individuals may be considered state residents for voting or other legal purposes after being in the state for a short period of time, the tuition law specifies additional requirements for classification as "in-state" for tuition purposes. The tuition law, which applies to all public institutions of higher education in Colorado, is subject to judicial interpretation and change at any time by the Colorado Legislature. CSU must apply the rules set forth in the Colorado Revised Statutes, and is not free to make exceptions except as specifically permitted under the Statute.

Note: This information is considered to be general guidance and is not legal advice. Refer to State Statute to review the actual law.

**Definition of "In-State Residency" for Tuition Purposes**

Under the Colorado tuition law, the term "in-state" student means: "A student who has been domiciled in Colorado for one year or more immediately preceding the first day of classes for the term for which such status is claimed." Further the tuition law states: "Attendance at an institution of higher education, public or private, within the state of Colorado shall not alone be sufficient to qualify for domicile in Colorado."

The Statute states that the applicant has the burden of providing clear and convincing evidence that a Colorado domicile has been established for the required one-year period. CSU may require completion of appropriate forms and additional documentation as necessary to make a determination of domicile. After registration, the initial tuition classification will remain unchanged absent clear and convincing evidence to the contrary.

In-state classification requires a domicile in Colorado for 12 months on or prior to the first day of classes of each semester. "Domicile" is the legal term used to describe the place where a person has chosen to make a true fixed and permanent home. Domicile is made up of two components: physical presence and evidence of intent. Both physical presence and evidence of intent must be established for 12 months on or prior to the first day of classes. A student can only establish domicile in Colorado for tuition purposes if he or she intends to reside permanently in the state and meet the definition of a "Qualified Person."

Initial residency determination for tuition purposes of any student enrolling at CSU is determined by the Office of Admissions. To be initially considered for in-state classification you must answer all residency questions completely and accurately on the application and submit requested evidence substantiating their claim. Failure to do so will result in classification as out-of-state for tuition purposes.

**In-State Status: Other Circumstances**

Exceptions to the one-year residence requirement exist for the following:

- Colorado National Guard members
- Active-duty military stationed in Colorado
- Honorably-discharged members of the U.S. armed forces
- Returning active-duty military members
- Canadian military stationed in Colorado
- Employees of companies moving to Colorado receiving government economic incentives
- Western Regional Graduate program enrollees (WICHE)
- A student, other than a nonimmigrant alien who attended a Colorado high school for three years who is admitted into a Colorado Institution of High Education within twelve months after graduation or completing a G.E.D. in Colorado.

For detailed explanation of the requirements for these exceptions, including spouse eligibility, go to CSU's Office of Financial Aid (https://financialaid.colostate.edu/base-tuition) or the Colorado Higher Education Residency Guide (http://highered.colorado.gov/Finance/Residency).

**International Students**

International students who are lawful permanent residents or who are admitted as refugees are eligible to establish domicile for tuition purposes. Nonimmigrant aliens who are residing in Colorado for purposes other than education may qualify for in-state status after one year of Colorado domicile. A nonimmigrant with the following student visa categories cannot qualify for in-state tuition classification: F-1, F-2, H-3, H-4 (if the visa holder is the spouse or child of an H-3), J-1 and J-2 (if the J-1 visa holder is a student or trainee), M-1 and M-2.

**Petition for Reclassification**

A petition may be filed if a student wishes to contest out-of-state classification or if the student has subsequently become eligible for

Class Attendance and Final Exams

Assessment of Tuition and Fees Based on Registration Changes in Full-or-Part-Time Status

Tuition and fees will be adjusted for students that go above or below the nine-credit assessment cut-off during the add/drop period at the beginning of the semester. The specific dates are listed in the appropriate online class schedule. After this deadline, there is no adjustment in tuition and fees if students drop any portion of the courses for which they are registered.

Continuous Registration

All students admitted to a graduate degree program are required to be continuously enrolled in their degree programs in the fall and spring semesters. This policy applies from the time of first enrollment through the graduation term. Students should contact their advisor if they do not plan to register for at least one credit of course work or research. Students graduating in summer term are required to be registered for at least one credit or Continuous Registration (CR). Students registering for CR will be assessed a fee for each semester of CR registration. If Continuous Registration is added on or after the first day of the term, a $50 late registration charge will be applied. See Special Fees.

Students enrolled for Continuous Registration in any term may not be considered enrolled full time for the purposes of, for example, financial aid, student loans, visas, or employment. Moreover, to receive full privileges for the summer term, students must be enrolled either in the summer or for the following fall term.

Credit Load

Graduate assistants are required to register for at least one credit of course work and/or research during fall and spring terms. Assistants who have an appointment in effect in the summer must register for such credits as the appointing department may require. Students on other forms of financial assistance should register for the number of credits required by the sponsor.

Independent Study

Independent study is a type of learning that supplements regular, supervised classroom instruction by permitting the student to carry such learning even further, working independently under necessary and sufficient guidance of a supervising instructor. While details of each independent study project are negotiated by the student and instructor, the expectation is that at least three hours per week of directed effort on the student’s part is required for each credit. Personal contact (face-to-face, telephone, Internet, or other forms of communication) is expected.

The instructor and the student shall specify in writing the requirements the student should fulfill to complete the course, including due date, contact expectations, number of credits, and other pertinent information. The instructor, student, and department head shall sign this statement and retain a copy. Upon completion of the project, a copy or description of the work involved shall be retained in the department for at least seven years.
About Grades

See Grade Points

Student Option Satisfactory/Unsatisfactory

Satisfactory/Unsatisfactory registration for graduate students is subject to limitations imposed by graduate committees and departments. Required courses listed on the program of study may not be taken on a "student-option satisfactory/unsatisfactory" basis. Courses which are offered "satisfactory/unsatisfactory only" or "instructor option satisfactory/unsatisfactory" are acceptable. Background courses may be taken "student-option satisfactory/unsatisfactory" if department policies permit. Registration for satisfactory/unsatisfactory should be approved by the advisor prior to enrollment and cannot be altered except during the schedule change period. Repeating a course on a satisfactory/unsatisfactory basis for which a previous traditional grade was assigned will not alter the effect of the previous grade on the GPA. For "student-option satisfactory/unsatisfactory" courses:

- A correct satisfactory/unsatisfactory registration including advisor approval is the express responsibility of each student.
- Performance equivalent to a grade of C or better is recorded as S (Satisfactory); performance equivalent to a D or F is recorded as U (Unsatisfactory). Neither the S nor U are used in calculating the CSU grade point average.
- A grade for a course taken as satisfactory/unsatisfactory may not be converted to a traditional grade for purposes of improving the GPA to meet graduation or scholastic requirements.
- When it is determined that an ineligible student is or has been registered for a satisfactory/unsatisfactory course, a traditional grade will be assigned.

ABOUT CSU

Colorado State University is one of the nation’s top public research universities and continues to be an institution on the rise. The key to our success is a combination of outstanding quality and commitment to excel in all we do.

CSU was founded as the Colorado Agricultural College in 1870, six years before the Colorado Territory was granted statehood, and it was one of 68 land-grant colleges established by President Abraham Lincoln’s signing of the Morrill Act. Our land-grant tradition of providing a high-quality, affordable higher education to all who have the desire and ability to achieve it runs deep, and CSU remains the “university of choice” for Colorado residents – more Colorado high-school students choose CSU than any other campus. Thirty percent of the state’s science, math, engineering, and technology majors pursue degrees at CSU.

We offer exceptional academic programs, with 76 undergraduate degree programs, 105 graduate degree programs, 27 professional master’s degree programs, and our prestigious Professional Veterinary Medicine program. Many of CSU’s academic programs are ranked among the best in the nation and world. Our world-class research and scholarship attract well over $330 million in research funding every year, and CSU ranks second nationally in federal research funding for universities without a medical school.

Faculty at CSU are among the best in their fields and combine classroom learning with experiential learning in the field and laboratory. More than 5,000 CSU students participate in undergraduate research opportunities every year, and even as CSU has grown, we’ve kept our student:faculty ratio at 18:1.

Within six months of graduation, more than 81 percent of our students have secured employment or continuing education – and our graduates are employed at a rate 10% higher than the national average. It’s no wonder more that 90 percent of graduates say they would choose CSU again.

CSU educates students both to make a living and to make a difference – and our faculty transform the world through their research, scholarship, and teaching. This is what it means to be a land-grant university in the 21st century, and Colorado State University is proud to carry on that distinguished academic tradition.

Land Grant Tradition

Our Land-Grant Mission

The idea of the land-grant university arose in the middle of the 19th century around a set of converging social and cultural changes in the United States. In an era of economic, social, and political turmoil, U.S. Representative Justin Morrill, a Vermont native and son of a blacksmith, proposed the notion of government land-grants to support practical public education for the working classes. President Abraham Lincoln signed the first Morrill Act into law on July 2, 1862. This act dictated that proceeds from the sale of land in each state would be invested in a perpetual endowment to support colleges of agriculture and mechanic arts. The signing of the second Morrill Act in 1890, the Hatch Act in 1887 (to establish Agricultural Experiment Stations), and the Smith-Lever Act of 1914 that created the Cooperative Extension Service formed the basis of the land-grant model as it exists today.

The spirit of the Act was, and is, to enable all citizens of the United States to participate in the nation’s economic and social progress. After one hundred and fifty years of profound social and economic transformation, the core values embodied in that spirit remain.

Colorado State University is a land-grant university. CSU came into existence as part of Lincoln and Morrill’s dream to make a great college education available to every American.

To be a land-grant university in the 21st century means:

• Inclusion, Opportunity, and Success: We are proud to provide access to opportunity to anyone with the motivation and ability to earn a degree. With the signing of the Morrill Act, for the first time in history, higher education became broadly open to people from all walks of life. At CSU, we prize diversity and the rich history that different populations bring to the academic community – as well as the rich history of the land and region on which our university is built.

• Research that Transforms Our World: CSU ranks among the leading research universities in the nation and is home to world-class discovery. CSU research and scholarship advances the quality of life for people in Colorado and around the world. Our faculty and students lead innovative discovery and scholarship to solve local and global problems and expand our understanding of our world and the challenges that confront it.

• Service to Society: As the birthplace of the Peace Corps, CSU holds a strong belief that innovation can positively impact the quality of life for people worldwide. The people of Colorado State believe service to society and our world is a high calling. Our faculty and staff deploy knowledge and education to address pressing global challenges and improve the quality of life for people in Colorado and around the world, in keeping with our historic commitment to service and engagement. Students also put this value into action through their involvement and service on and off campus, whether collecting cans of food to feed the hungry in Fort Collins, participating in an alternative spring break trip, or working with faculty on projects in the developing world.

• Education to Meet the Challenges of Today and Tomorrow: CSU provides a pragmatic, meaningful, and transformational educational experience to prepare the next generation of scientists, artists, educators, and entrepreneurs. CSU alumni use their talents and expertise to transform our world, and their education is a cornerstone of a prosperous economy. CSU graduates have won Pulitzer Prizes, flown on space shuttle missions, led states and nations, made brilliant scientific discoveries, and had an impact on communities and industries worldwide.

• Excellence Above All: In all we do, we strive for excellence. CSU is a place where students build academic and personal success; where groundbreaking research is conducted and discovery achieved; where innovation is readily deployed to meet local and world demands; and where alumni celebrate transformative lives and careers. We provide an outstanding, dynamic educational experience as the foundation for student success and retention. As one of the nation’s leading research universities, Colorado State sets a high standard – and aims

Agricultural research has been part of Colorado State University (CSU) since the institution’s beginning. In 1888, the Colorado General Assembly established the Colorado Agricultural Experiment Station (CAES) (http://aes.agsci.colostate.edu) as the contributor to the federally-created state agricultural experiment station system established by the Hatch Act, currently encompassing all fifty states and United States territories.

The CAES is an integral part of CSU and a unit within the College of Agricultural Sciences. The Colorado Agricultural Experiment Station creates and disseminates knowledge related to agriculture and natural resources with the overarching goal of enhancing economic viability and environmental sustainability in ways that are socially acceptable. Further, the CAES applies this knowledge to solving practical problems of producers and consumers.

The CAES supports faculty, staff, and students across CSU who conduct research on crop and livestock production, food systems, and natural resources problems. Our research is conducted in Fort Collins in seven of eight colleges, in more than 15 academic departments, and at seven off-campus research centers located throughout the state. The CAES is not a place but rather is an administrative umbrella that oversees research programs taking place on campus and at seven research centers across Colorado. These research centers are the Agricultural Research, Development and Education Center (ARDEC) in Fort Collins, the Arkansas Valley Research Center in Rocky Ford, the Eastern Colorado Research Center in Akron, the Plainsman Research Center in Walsh, the San Luis Valley Research Center in Center, the Southwestern Research Center in Yellow Jacket, and the Western Colorado Research Center with locations in both Orchard Mesa and Fruita.

Agricultural research programs include the traditional areas of producing and processing food products such as wheat, beef, potatoes, fruits, and vegetables, as well as discovering how foods and diets influence human nutrition and health, new kinds of textiles we wear, the ornamental plants and gardens we enjoy, and sustainable use of rangelands where high-quality water comes from and which support grazing livestock and wildlife.

The CAES partners with CSU Extension, industry, schools, and any others who can help get new information and technologies into the hands of those who need it.

The Colorado State Forest Service (CSFS) (http://csfs.colostate.edu) is a service and outreach agency of the Warner College of Natural Resources and provides staffing for the Division of Forestry within the Colorado Department of Natural Resources. The CSFS serves as the lead state agency for providing forest stewardship and management, fuels reduction and wildfire mitigation assistance to Colorado landowners through 19 district and field offices throughout the state. Every year, the CSFS helps treat thousands of acres of forestland, assisting landowners and communities to help improve forest health and ensure related benefits. The CSFS provides a wide range of forestry services through focused programs that deliver measurable, impactful results, using a non-regulatory approach, strategic partnerships and personalized service. The agency also provides forestry education and outreach to the citizens of Colorado and grows and distributes seedling trees and shrubs for conservation purposes.

Extension

(970) 491-6281

Colorado State University Extension (CSUE) (http://www.ext.colostate.edu) provides information and education that encourages the application of research-based knowledge in response to local, state, and national issues affecting individuals, families, businesses, and communities of Colorado.

Extension in Colorado was established in 1913 when counties created programs. In 1914 federal legislation created the Extension system nationwide. It was accepted by Colorado’s General Assembly in 1915, and reaffirmed in 1979. It is funded by county, state, and federal appropriations. Extension also functions as the educational arm of the U.S. Department of Agriculture, through each state’s land grant university. CSUE has 54 off-campus offices and serves 62 of Colorado’s 64 counties.

Extension’s outreach educational objectives fall within the scope of their land-grant mission and address high-priority needs and issues.
in Colorado in the broad areas of agriculture and natural resources, family and consumer sciences, 4-H youth development, and community development. Ongoing program teams focus on critical areas including: strong families, healthy homes; nutrition, health, and food safety; 4-H and youth development; community economic development; natural resources—including water and alternative energy; and competitive and sustainable agriculture systems.

**CSU System**

**Colorado State University System**

410 Seventeenth Street, Suite 2440
Denver, CO 80202
(303) 534-6290

The Colorado State University System (http://www.csusystem.edu) has three campuses with distinct roles and missions that together serve the state, region, country, and the world, educating more than 40,000 new and returning scholars annually. Colorado State University in Fort Collins, the System's flagship, is a doctoral-granting research university and the state's land-grant institution. Colorado State University-Pueblo is a comprehensive regionally focused university and a federally designated Hispanic-Serving Institution offering both graduate and undergraduate degree programs. CSU-Global Campus is the nation’s first, independent, 100 percent online public university, created to serve adult learners in Colorado and beyond. The CSU System is led by a Chancellor who is also the president of the Fort Collins campus. The Chancellor works with the appointed Board of Governors of the CSU System to further the role and mission of the System universities and ensure exceptional service to Colorado.

**Board of Governors of the Colorado State University System**

The Board of Governors (http://www.csusystem.edu/board-of-governors/board-members) consists of 15 members, nine of whom are voting members appointed by the Governor, as provided in Colo. Rev. Stat. § 23-30-101. The remaining members represent the component universities of the Colorado State University System with one faculty member and one student leader from each campus.

The Board of Governors fosters development of Colorado State University, Colorado State University—Pueblo, and Colorado State University—Global Campus, and supports these separate and distinct institutions through careful planning and resource development. The Board strives to maintain each institution's flexibility to address challenges and opportunities that arise as the institutions seek to fulfill their statutory missions, consistent with the policies of the Colorado Commission on Higher Education.

The Board also supports opportunities for cooperation in program and resource sharing among the institutions and facilitates system-wide financial accountability.

**Accreditation**

All academic and professional degrees and all course credits earned at Colorado State University are accredited by The Higher Learning Commission (https://www.hlcommission.org) through regional accreditation. Institutional accreditation by the HLC, also known as regional accreditation, provides assurance that course credits and degrees earned at CSU meet rigorous quality standards. Accreditation is a requirement for federal financial aid and may be a requirement for some employment opportunities, professional licensure, and graduate education.

![Accredited](https://www.hlcommission.org)

**Assessment of Program Quality and Continuous Improvement**

Academic degree programs are periodically reviewed through an internal process to assure the relevancy and high quality expected of a CSU degree. Each degree program defines meaningful student learning outcomes that identify the specific knowledge, competencies, skills, abilities, and values that students should be able to demonstrate upon completion. Defensible standards for evaluating whether students are achieving those outcomes are established and monitored. Appropriate assessment of student learning outcomes may include both direct and indirect measures (comprehensive exams, thesis projects, internship evaluations, reflective journals, peer comparisons, job placement rates, graduate school acceptance rates etc.). Departments are responsible for the collection and analysis of learning outcomes data and additionally responsible to demonstrate that the findings are used in a process of continuous quality improvement within the degree program.

Fort Collins Community

The Colorado State University main campus is located in Fort Collins, an award-winning city of about 155,000 residents, located an hour north of Denver near the foothills of the Rocky Mountain Front Range. Easy access to bike trails, hiking, skiing, water sports, rafting, fishing, and other outdoor sports make Fort Collins an ideal location for those looking for outdoor adventure and natural beauty coupled with a vibrant and diverse community.

The county seat of Larimer County, Fort Collins is 65 miles north of Denver on Interstate 25, 45 miles south of Cheyenne, Wyoming, and within an hour’s drive of such major recreational areas as Estes Park, Red Feather Lakes, Horsetooth Reservoir, and several mountain parks, including the 790,000-acre Roosevelt National Forest and Rocky Mountain National Park.

Located at an elevation of 5,000 feet, Fort Collins has a clear, dry atmosphere, more than 300 days of sunshine and generally pleasant temperatures throughout the year. The summer temperature ranges from an average high of 85°F to an average low of 52°F; the winter temperature ranges from an average high of 42°F to an average low of 13°F.

Fort Collins is home to a robust arts and entertainment culture and includes an active local music scene, several museums, a vibrant public library district, the civic symphony, and CSU’s own University Center for the Arts. The packed University calendar – athletics events, guest speakers, art exhibits, theater, cinema, concerts – adds to community life. This broad spectrum of cultural and outdoor recreational facilities, the excellent climate, and the mountain surroundings contribute to making Fort Collins an ideal university setting.

3. State Guaranteed Transfer (GT- subcode)
By legislation, lower-division CSU courses in categories 1-3 of the All-University Core Curriculum (AUCC) must be submitted to and approved by the Colorado Commission on Higher Education (CCHE) (http://highered.colorado.gov/Academics/Transfers/gtPathways/curriculum.html) as general education courses guaranteed to transfer among all public higher education institutions within the state. The subcode refers to the specific statewide general education category the course fulfills. For a complete listing of the courses approved statewide, visit the CCHE (http://highered.colorado.gov/Academics/Transfers/gtPathways/curriculum.html) site. (http://highered.colorado.gov/Academics/Transfers/gtPathways/curriculum.html)

4. Credits and Clock Hour Distribution
The distribution of credit for lecture/laboratory/discussion or recitation class periods per semester is as follows: in the example 04(2#2#1), the number outside the parentheses indicates the number of credits of this course. Inside the parentheses, the first number indicates the number of clock hours spent in lectures each week, the second number indicates the number of clock hours spent in laboratory/studio each week, and the third number indicates the number of clock hours spent in discussion, recitation, seminar, or other each week.

Variable Credit Courses
VAR indicates variable credit with no specific minimum credit or no maximum credit indicated. May vary from 1-18 credits. Prior to registering, students should consult department for the number of credits to register for.

Var[#9] indicates variable credits with minimum and maximum numbers of credits per term. Prior to registering students should consult the department for the specific number of credits to register for.

The course listing may indicate other credit limitations.

5. Course Description
A brief description of the content of the course.

6. Prerequisites
Students must meet all course prerequisites prior to registration for a specific course, or acquire the instructor’s permission.

Permission of the instructor for a student to register for a course is implied when the student has met specified prerequisites. All prerequisites may be considered to have been met if a student presents evidence of credit earned in equivalent courses or if knowledge equivalent to the prerequisites listed is demonstrated.

A department may limit the enrollment in a course; courses may be limited to a specific number of students, to students in specified majors, or to students of specified class levels.

In the listing in this catalog, only the most recent version of a course number is shown as a prerequisite.

7. Registration Information
Additional course information students need prior to registering for a course. Courses are offered Face-to-Face unless otherwise noted. Courses approved for online are identified. There may be courses offered through CSU Online/Division of Continuing Education (http://www.online.colostate.edu). Check the class schedule or department for...
availability. Additional information (e.g., Required Field trips) will be listed here.
